**THE CYCLE
OF
1930**

The Year Book
of
Armour Institute of Technology
Chicago, Ill.

Published by
The Classes of 1930 and 1931
Volume 18

TO one with such a perfect understanding,
and ever helpful hand; one with the courageous heart which makes men admire and trust him to any limit; we feel honored to dedicate this volume. Our esteemed professor and Dean of Students,

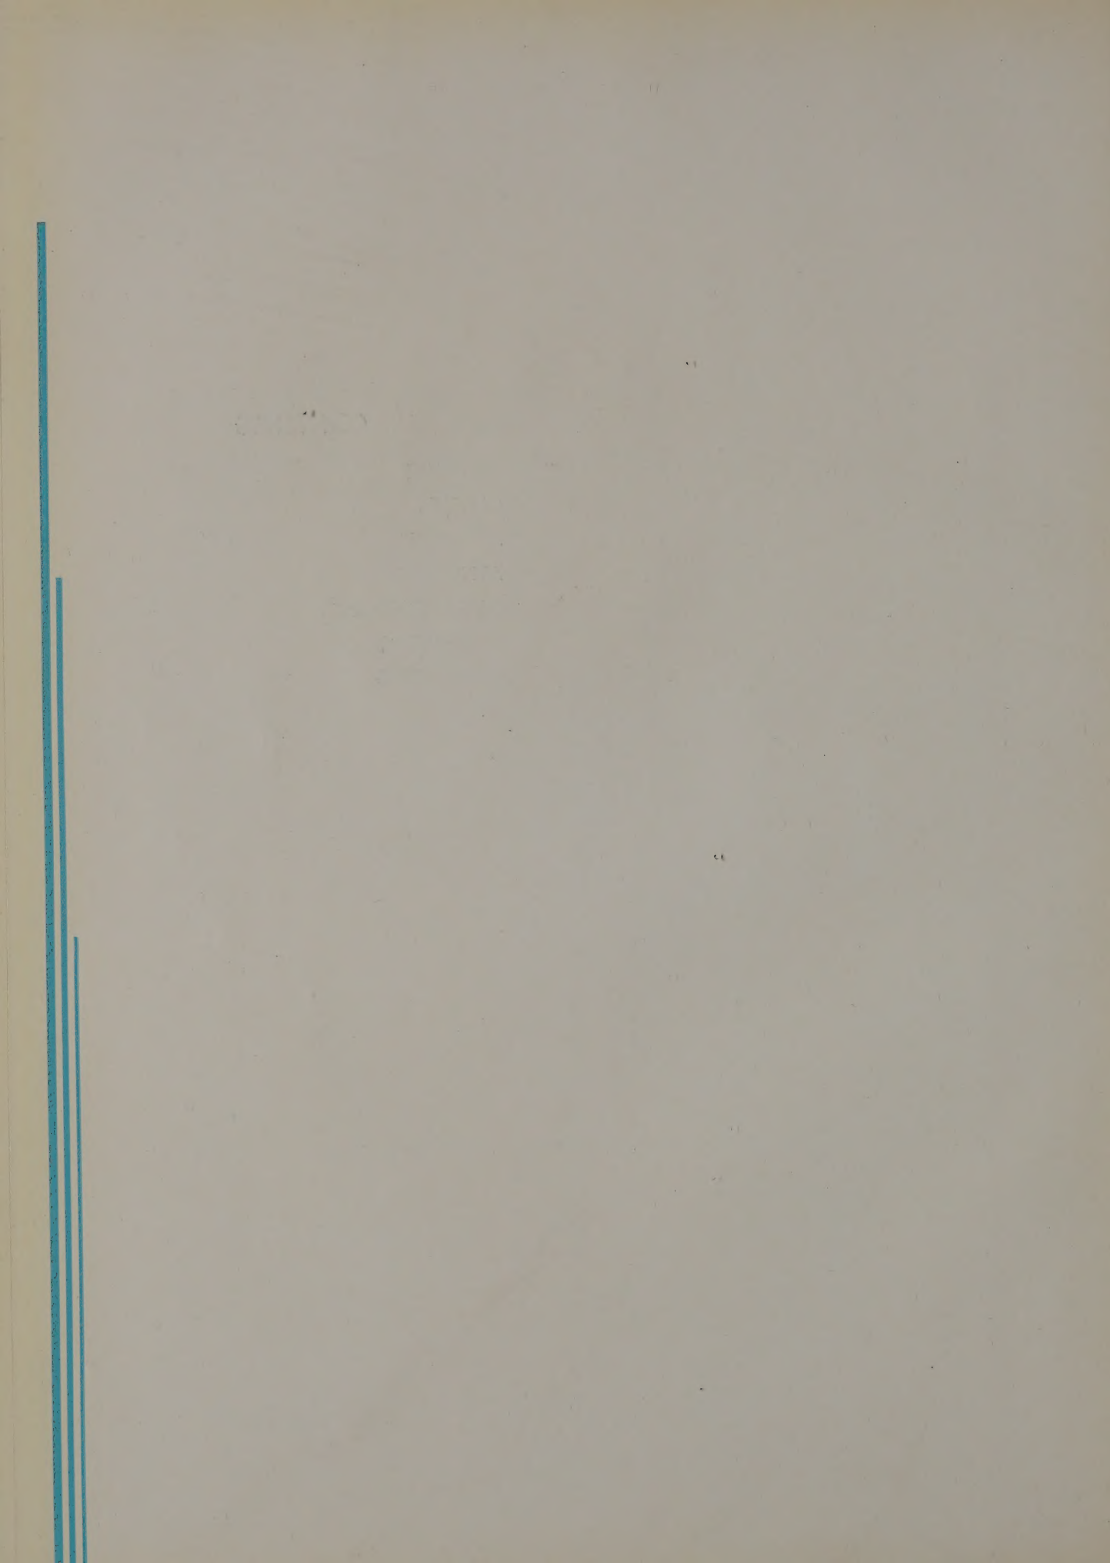

CLAUDE IRWIN PALMER.

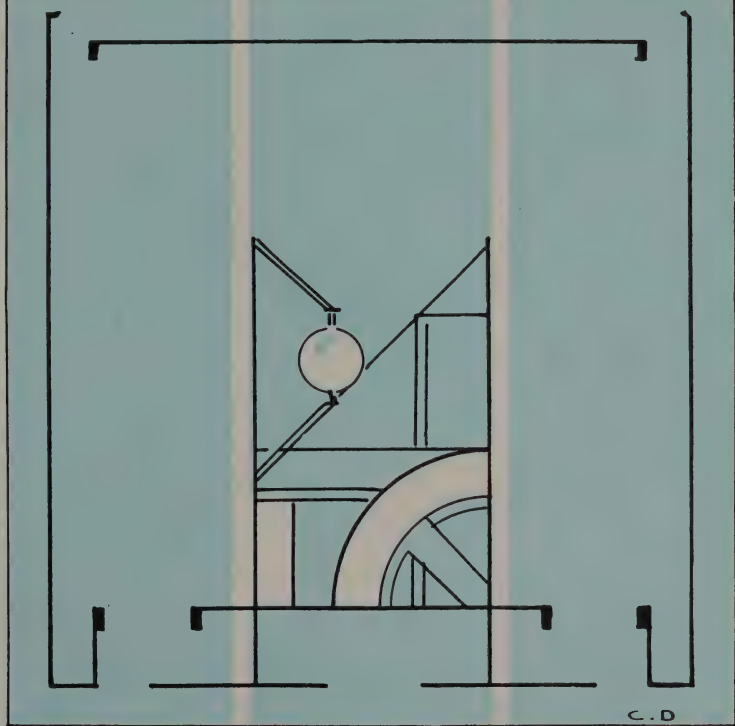

The Cycle of 1930—a lasting tribute to the many enjoyable and interesting events which have taken place during the past year. May their memories linger long and be more vivid as the years pass.

A MESSAGE FROM THE PRESIDENT—1930 CYCLE

The Engineer is a man; technical training is but one of his tools. A safe and reliable engineer is an honest and conscientious man; an able engineer is a well-trained, far-seeing man, and a great engineer is a man who, possessing all of these qualities in an unusual degree, has achieved success through his work and accomplishment.

The student of engineering, if he would look forward to a favorable termination of a professional career, must consider all things which make for a well-rounded manhood. He must possess a nature which is large and sympathetic, and his interests must be comprehensive enough to extend beyond the narrow limits of his own personal affairs. In this scientific age, a tremendous responsibility rests upon the engineer, greater than ever before.

President Hoover, in a recent address, declared that in solving the problems of government "We have need for a large leavening of the engineering knowledge and engineering method." His chief contention was that the absence of emotion, which is considered an outstanding characteristic of the engineer, is just as essential in the proper handling of government problems as in private enterprises. "They are unsolvable without the fundamental engineer's approach to truth," he said. "That is, first to determine the facts, arrange these facts in proper perspective, and then distill truth from them in the retort of experience."

The President in these statements was thinking of the value of the engineer in public service, but what he said was equally applicable to engineering service in any capacity. It is plain, therefore, that a realization of their importance should be accompanied in engineers by a heightened sense of duty. They should be more eager than ever to give to the people the best and noblest efforts of which they are capable. From the young men of Armour Institute of Technology we expect the best of which they are capable, and a keen realization of their sense of duty as students in a great profession. The wise student will never permit his daily work to become a burden. The work must not be a taskmaster; he must be the master. There can be no mastery without interest and enthusiasm, and they are the qualities which must be depended upon to transform tasks which are difficult into opportunities to be enjoyed.

—HOWARD M. RAYMOND.

ADMINISTRATION

HOWARD MONROE RAYMOND.....President

PHILIP DANFORTH ARMOUR.....Vice-President

GEORGE SINCLAIR ALLISON.....Secretary and Treasurer

JOHN CORNELIUS PENN.....Dean of Engineering

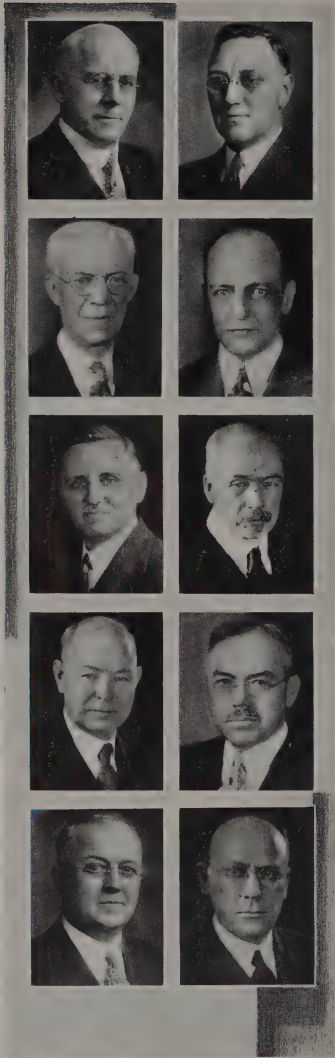

CLAUDE IRWIN PALMER.....Dean of Students

ROBERT VALLETTE PERRY.....Director of Evening Classes

ELLEN STEELE Librarian

WILMOT C. PALMER.....Cashier

ERNEST KELLY Recorder

CLAUDE IRWIN PALMER A.B.
Dean of Students, Professor of Mathematics and
Head of the Department.

JOHN CORNELIUS PENN B.S., C.E.
Dean of Engineering and Professor of Civil Engi-
neering.
Tau Beta Pi, Chi Epsilon, Theta Xi.

ALFRED EDWARD PHILLIPS A.B., A.M., C.E., Ph.D.
Professor of Civil Engineering and Head of the De-
partment.
Sigma Xi, Honorary Member of Triangle, Honorary
Member of Tau Beta Pi, Honorary Member of Chi
Epsilon, Phi Delta Theta.

GEORGE FREDERICK GEBHARDT A.B., M.A., M.E.
Professor of Mechanical Engineering and Head of
the Department.
Tau Beta Pi, Pi Tau Sigma, Phi Delta Theta.

GEORGE LAWRENCE SCHERGER A.B., Ph.D.
Professor of History and Political Science, Head of
the Department.
Phi Beta Gamma.

GUY MAURICE WILCOX A.B., A.M.
Professor of Physics and Head of the Department.

HARRY MC CORMACK B.S., M.S.
Professor of Chemical Engineering and Head of
the Department.
Tau Beta Pi, Phi Lambda Upsilon, Phi Beta Kappa.

ERNEST HARRISON FREEMAN B.S., E.E.
Professor of Electrical Engineering and Head of
the Department.
Phi Pi Phi, Tau Beta Pi, Eta Kappa Nu, Phi Kappa
Phi.

CHARLES EDWARD PAUL S.B.
Professor of Mechanics and Head of the Depart-
ment.
Tau Beta Pi, Sphinx, Theta Xi.

JOSEPH BERNARD FINNEGAN S.B.
Professor of Fire Protection Engineering and Head
of the Department.
Tau Beta Pi, Salamander, Sphinx.

That he is one of Armour's most popular pro-
fessors is not ap-Paul-ing, is it?

EARL H. REED, JR. S.B.
Professor of Architecture, and Head of the Department.
Delta Kappa Epsilon.

CLYDE BARNES COOPER A.M., Ph.D.
Professor of English, and Head of the Department.

WALLACE BRUCE AMSBARY
Professorial Lecturer in General Literature.

JOHN EDWIN SNOW B.S., A.M., M.S., E.E.
Professor of Electric Power Production.
Eta Kappa Nu.

MELVILLE BAKER WELLS B.C.E., C.E.
Professor of Civil Engineering, and in charge of Aeronautical Engineering.
Tau Beta Pi, Honorary Member of Chi Epsilon, Phi Delta Theta.

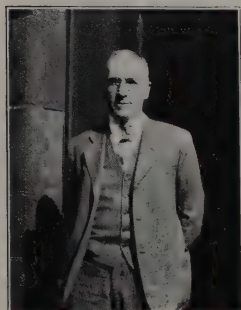

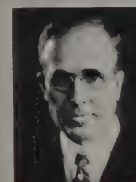

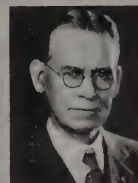

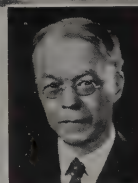

ROBERT VALLETTE PERRY B.S., M.E.
Professor of Machine Design, and Director of Evening Classes.
Tau Beta Pi, Theta Xi.

CHARLES WILBUR LEIGH B.S.
Professor of Analytic Mechanics.
Tau Beta Pi, Sigma Kappa Delta, Phi Gamma Delta.

DAVID PENN MORETON B.S., E.E.
Professor of Direct and Alternating Current Machinery.
Tau Beta Pi, Eta Kappa Nu, Sigma Kappa Delta.

BENJAMIN BALL FREUD Ph.D., Ch.E.
Professor of Organic Chemistry.
Phi Beta Kappa, Sigma Xi.

CHARLES AUSTIN TIBBALS, JR. A.B., A.M., Ph.D.
Professor of Analytical Chemistry.
Phi Lambda Upsilon, Sigma Xi, Honorary Member of Triangle, Phi Gamma Delta.

We know that R. V. can work a finesse in bridge but has any one ever finessed a credit in night school?

DANIEL ROESCH B.S., M.E.
Professor of Automotive Engineering.
Tau Beta Pi, Pi Tau Sigma, Phi Pi Phi.

JAMES CLINTON PEEBLES B.S., E.E., M.M.E.
Professor of Experimental Engineering.
Sigma Xi, Gamma Alpha, Tau Beta Pi, Pi Tau
Sigma, Sphinx, Sigma Kappa Delta.

THOMAS EATON DOUBT B.S., M.A., Ph.D.
Associate Professor of Physics.
Sigma Xi.

OLIVER CHARLES CLIFFORD A.B., Ph.D.
Associate Professor of Electrical Engineering.
Sigma Xi.

HENRY LEOPOLD NACHMAN B.S., M.E.
Associate Professor of Thermodynamics.
Tau Beta Pi, Phi Pi Phi.

EDWIN STEPHEN LIBBY B.S., M.E.
Associate Professor of Experimental Engineering.
Tau Beta Pi, Pi Tau Sigma, Sigma Kappa Delta.

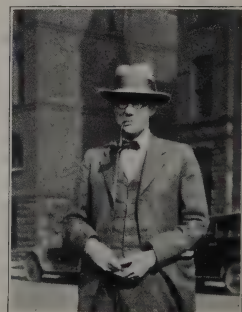

PHILIP CONRAD HUNTLY B.C.E.
Associate Professor of Experimental Engineering.
Sigma Xi, Tau Beta Pi, Pi Tau Sigma, Chi Epsilon,
Triangle.

EUGENE EDWARD GILL A.M., Ph.B., Ph.D.
Associate Professor of General Chemistry.
Phi Beta Kappa.

JOHN FREDERIC MANGOLD B.S., C.E.
Associate Professor of Mechanics.
Beta Psi.

WILLIAM CHARLES KRATHWOHL A.B., M.A., Ph.D.
Associate Professor of Mathematics.

We wonder if Olson makes a machine sturdy
enough to test the strength of P. C.'s pipe.

ALBERT H. KREHBIEL
Associate Professor of Freehand Drawing and
Water Color.

CHARLES ROSCOE SWINEFORD B.S.
Associate Professor of Machine Design.

OTTO LOUIS ROBINSON B.S.
Associate Professor of Fire Protection Engineering.
Salamander, Acacia.

ROE LOOMIS STEVENS B.S.
Associate Professor of Bridge and Structural En-
gineering.
Honorary Member of Chi Epsilon.

WALTER HENDRICKS A.B.
Associate Professor of English.
Phi Beta Kappa, Sphinx, Phi Delta Theta.

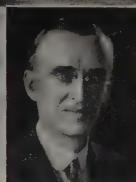

RALPH W. HAMMETT B.S. A.M.
Associate Professor of Architectural History.

STANTON EDWIN WINSTON A.B., B.S., A.M., M.E.
Associate Professor of Kinematics.

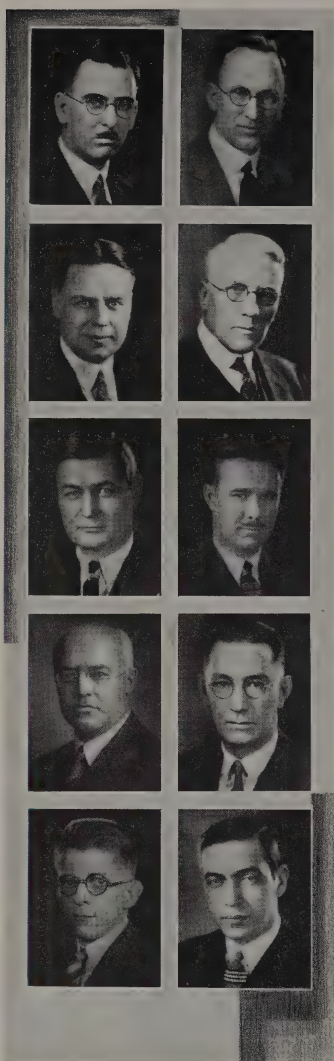

WILLIAM WHITE COLVERT A.B., A.M.
Associate Professor of Physics.
Sigma Xi.

ARTHUR F. DEAM B.A., F.A.A.R.
Associate Professor of Architectural Design.
Pi Kappa Alpha.

ARTHUR HOWE CARPENTER A.M.
Associate Professor of Metallurgy.
Delta Tau Delta.

The Master of Machine Design—for with four
degrees there must be a machine. What's
the secret, Brother?

JOHN FRANCIS McNAMARA B.Sc., M.D.
Medical Adviser, and Examining Physician.
Kappa Psi.

CHARLES ANSON NASH B.S.
Associate Professor of Electrical Engineering.
Sigma Xi.

WILLIAM HENRY LÄUTZ B.S.
Assistant Professor of Architecture.
Tau Beta Pi, Scarab, Sigma Kappa Delta.

AUGUST C. WILMANN B.S.
Assistant Professor of Architectural Construction.

JOHN JOSEPH SCHOMMER B.Sc., Ch.E.
Assistant Professor of Industrial Chemistry.
Phi Kappa Sigma.

WILLIAM FRANK MC CAUGHEY, JR. A.B.
Assistant Professor of Architectural Design.
Honorary Member of Triangle, Delta Skull, Sigma Nu.

EMIL R. ZETTLER
Assistant Professor of Architectural Modeling.

RICHARD JOSEPH FOSTER B.Sc., M.E.
Assistant Professor of Descriptive Geometry.

LYNN EUGENE DAVIES B.S.
Assistant Professor of Experimental Engineering.

WALTER JOHN BENTLEY B.Sc., Ch.E.
Assistant Professor of Chemical Engineering.
Phi Lambda Upsilon, Beta Psi.

Do the volumes of Dawe's cause pulling of
hair g-Nash-ing of teeth? Ask the man who
owns one.

SAMUEL FLETCHER BIBB . S.B., M.S.
Assistant Professor of Mathematics.
Sigma Xi.

HARRY HOWE BENTLEY B.S.
Assistant Professor of Architectural Design.

DONALD ELMER RICHARDSON B.S., E.E., M.S.
Assistant Professor of Electrical Measurements.
Tau Beta Pi, Eta Kappa Nu, Sigma Kappa Delta.

HENRY TOWNLEY HEALD B.S., M.S.
Assistant Professor of Civil Engineering.
Tau Beta Pi, Sigma Tau, Phi Kappa Phi, Sigma Kappa Delta.

VAN BAUMAN TEACH B.A., B.E.E., M.Sc.
Assistant Professor of Mathematics.
Tau Beta Pi, Sigma Xi, Eta Kappa Nu, Pi Mu Epsilon, Phi Kappa Tau.

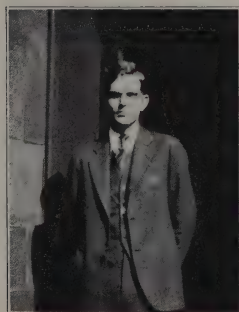

CHARLES PAGE HOLMES B.S.
Assistant Professor of Fire Insurance.
Salamander, Alpha Chi Epsilon.

WALTER HENRY SEEGRIST B.S.
Assistant Professor in Machine Design.
Phi Kappa Sigma.

ARTHUR WILLIAM SEAR B.S.
Assistant Professor of Elementary Machine Drawing.
Pi Tau Sigma.

HERBERT ENSZ B.S.
Assistant Professor in Civil Engineering.

ELDON C. GRAFTON B.S.
Assistant Professor of Structural Engineering.
Tau Beta Pi, Sigma Tau, Scabbard and Blade, Phi Kappa Phi.

What! A professor? He looks like a peach of a fellow.

THEODORUS M. HOFMEESTER
Assistant Professor of Architectural Modeling.

ELLEN STEELE
Librarian.

NELS PETER PETERSON
Instructor in Woodworking.

CHARLES HENRY FORNHOF
Instructor in Machine Tool Work.

CHARLES LEWIS LARSEN
Instructor in Founding.

WILLIAM CARL KRAFFT
Instructor in Physical Training.

A.B.

JAMES STRATTON THOMPSON
Instructor in Physics.
Sigma Xi. Sigma Alpha Epsilon.

B.S., Ph.D.

DONALD SARGENT ULLOCK
Instructor in Chemical Engineering and Curator of
the Chemical Laboratories.
Phi Lambda Upsilon.

B.S.

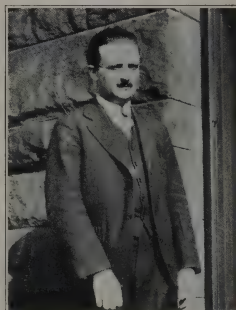

WALTER ARTHUR SPENCER
Instructor in Mathematics.

B.Sc.

HAROLD W. HAGGARD
Instructor in Mathematics.
Delta Phi.

B.S.

A Ph.D. for cornering an ion, but I'll take a
red-head anytime. Would that rate a De-
gree, Doctor?

W. LINDSAY SUTER
Instructor in Architectural Design.

B.S.

JAY EDWIN PETERSEN
Instructor in Architectural Design.
Scarab.

B.S., M.S.

F. T. FOERSTER
Instructor in Forge Shop.

FLETCHER W. PEARCE
Instructor in Civil Engineering

B.S., C.E.

CARL H. JOHNSON
Instructor in Fire Protection Engineering.
Phi Pi Phi.

B.S.

DOROTHY CORNWELL
Assistant Librarian.

B.A.

ELIZABETH O'LINN SMITH
Assistant Librarian.

ERNEST TUPES
Lecturer in Business Law.
Tau Beta Pi.

A.B., B.S., LL.B.

MYRON HENRY UMBREIT
Lecturer in Economics.

A.B., A.M.

How about some more illustrated lectures like
we got on the boot and shoe industry?

F. U. SMITH
FACULTY CLUB

OFFICERS

F. U. SMITH.....	Honorary President	C. P. HOLMES.....	Second Vice-President
G. S. ALLISON.....	President	J. S. THOMPSON.....	Secretary
W. HENDRICKS.....	First Vice-President	D. P. MORETON.....	Treasurer

Once more the Cycle approaches its perihelion and another chapter in the history of the Armour Faculty Club steps forward and, with professorial modesty, makes its bow to the world. Calling upon his faithful imagination not to desert him in his hour of need, the club historian marshals his facts, natural and synthetic, with whatever skill he may, and presents them as the authentic account of the Faculty Club's current contribution to the "record of what man has done." He does so with no blushes and no apologies, confident that his work will assay as high a percentage of verity as many other efforts, more dignified and important perhaps, in this branch of the fine arts.

During the past year the club has produced considerable evidence tending to prove that the human animal is the most adaptable of all Nature's creatures. Even the timid fauna which infest the Faculty Club have shown remarkable ability to adapt themselves to their surroundings, to develop a protective coating to shield them from an unkind environment, and so to live in comparative contentment under conditions where more sensitive creatures would certainly have given up in despair. Thus, student opinion to the contrary, none of our professors belong in the long list of Nature's mistakes. They survive because yesterday's sound and fury have become for them today's peace and quiet, yesterday's wonder today's commonplace.

For five years or more sensitive souls have found the clubrooms almost uninhabitable, due to the virulent radio discussions which have become, seemingly, endemic to the place. The extremity to which many of the members were reduced may be realized, faintly, from the following circumstances: Professor Gebhardt, trailing a Lucky Strike to its lair, got all tangled up in a screen grid discussion, and just managed to escape without buying a new radio. He has repented since with prayer and fasting, and now smokes a pipe. Professor John Barleycorn Snow became intoxicated with admiration for Professor Sear's erudition, and Professor Nash was

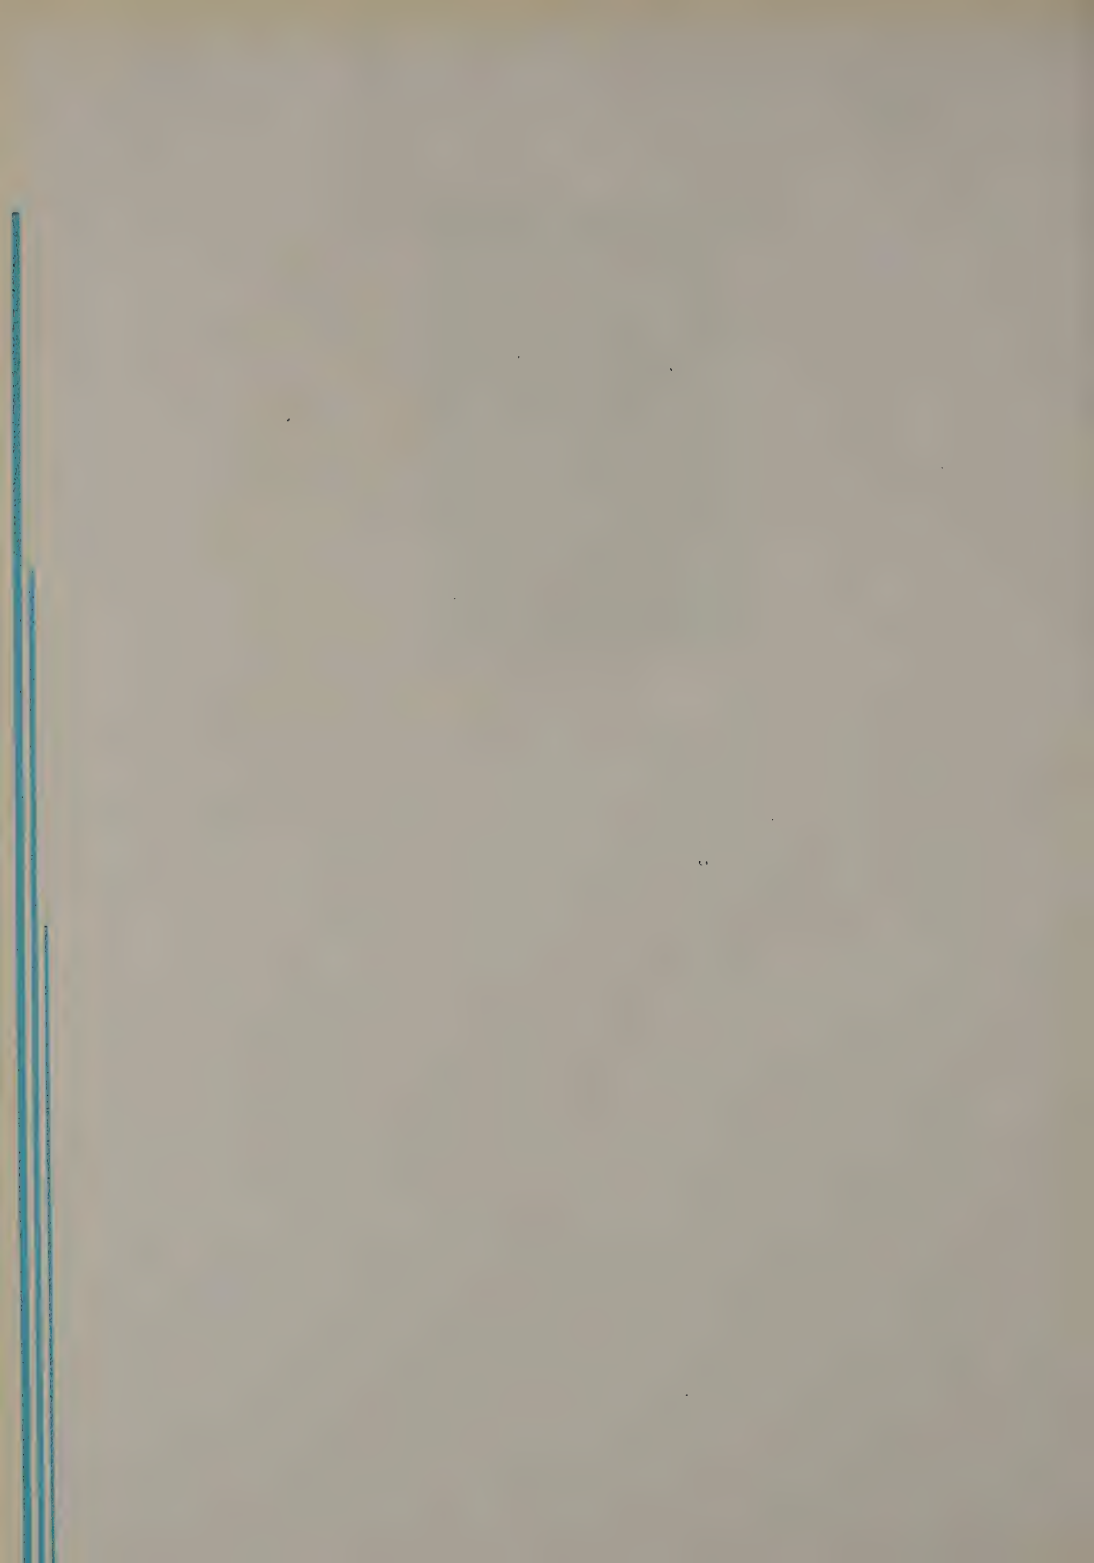

G. S. ALLISON

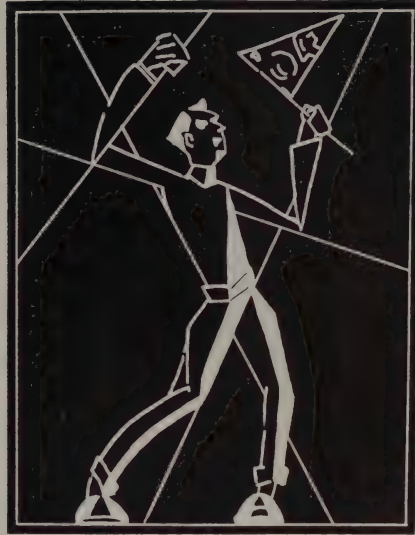

painfully injured when an audion discussion exploded. For a time it was feared that Professor Finnegan had suffered permanent damage due to spontaneous combustion; Doctor Thompson explained that the trouble was caused by the low frequency of the radio discussion, which produced much heat but very little light.

Happily these sad cases now occur no more. True, the battle still rages, perhaps with less fury than before, but the innocent bysitter is protected from injury. All have developed a case-hardened exterior against which the cacophony impinges harmlessly. Professor Schommer, with his usual passion for exact justice, insisted that the tireless talkers should have had the cyanide instead of all the other members, but his prescription called for an entirely different method of administering it. At all events comparative peace now reigns and Professor Perry, encased in his bullet-proof shell, peruses his favorite week-end journal in complete serenity.

Early in the present year, Mr. Peterson, for no reason whatever except an inherent agitating proclivity and a general distrust of professors, began to campaign for a business administration in the club. His platform was: A business man for president and a Scotchman for treasurer. Mr. Peterson, skillful politician that he is, conducted his campaign so successfully that Mr. Allison was chosen for president and Professor Moreton for treasurer. Now there is no doubt that the president conforms in every particular to the platform on which he was elected, but how about the treasurer? From long acquaintance with him the club historian does not hesitate to affirm that, with the exception of the insignificant detail that he was born in Ohio, Professor Moreton qualifies in every way as an excellent Scotchman, and a fellow countryman herewith salutes him. True to his racial characteristics, the new treasurer sent out bills for dues the day after his election.

Historians, perhaps, should never prophesy, but philosophers may. Inasmuch as philosophy is the present historian's avocation, a prediction may be ventured as to the future of the Faculty Club. Radio has now become a recognized part of the life of the modern man, as much so as the automobile in his garage or the steam radiator in his home. Wonderful as its future developments may be, it is likely that even professors will be able to retain their equilibrium. If so, the club members may look forward to many peaceful hours together, under the efficient management of their business administration.

The activities of the Armour Alumni Association during the 1929-1930 term were confined in the most part to four luncheons and the customary annual meeting and banquet which was held during the month of May.

The luncheons, which were held this year at the Chicago Engineers Club, located at 314 Federal Street, were fairly well attended. An average attendance of more than thirty-three alumni were present at the Association's functions. On these occasions the Association presented as guests the following individuals: President John J. Schommer, Judge Walter P. Steffen, Professor Wallace Bruce Amsbary of Armour Institute of Technology, and Professor B. G. Nelson of the University of

Chicago. Each guest addressed his luncheon hosts on his favorite subject. These included among others: football of the Eastern and Western variety, poetry, dialect readings and effective speech-making.

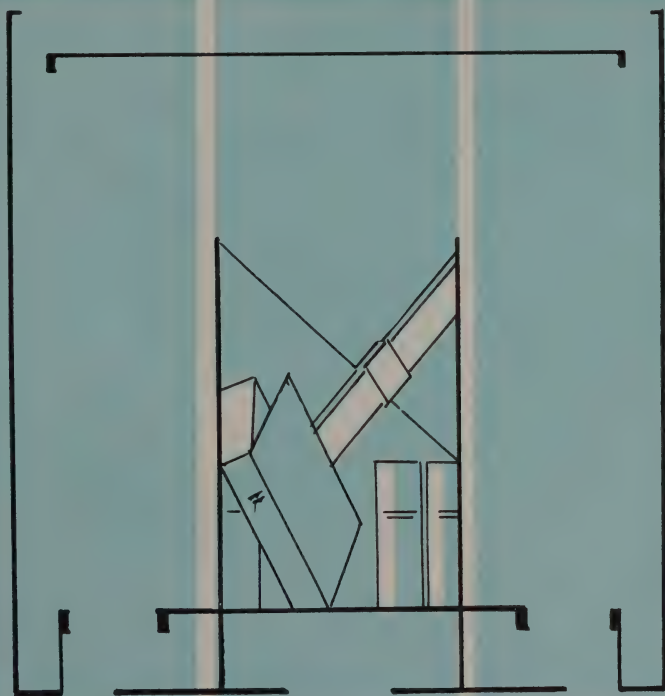

Those Alumni who were present at the February luncheon meeting were unanimously in favor of holding but one Alumni banquet each year. Accordingly plans for the winter reunion were dropped. The banquet in May was the occasion of the annual meeting and reunion of all Alumni for the 1929-1930 term. Plans at this meeting decided the date of the banquet which is to be held sometime in November or December.

At last a great Civil's dream has come true. Chris has joined the ranks of the Fire Protects in the Underwriter's Lab.

Four years ago the class of '30 was unheard of; a new class of freshmen of untried worth. Today underclassmen look up to the class of '30 graduates! Tomorrow we will be alumni—professional engineers—old timers. As we look back four years, we wonder at the changes that have been wrought in ourselves, in our attitudes, and in our outlook, during such a short period of time. Never again shall we witness such a transition.

Four years ago Armour was, to us, an ideal; a school unknown except by reputation and we chose it because of this reputation. Engineering we wanted; Armour was our choice.

Our Freshman year can be remembered for its newness and strangeness. Different attitudes were taken and the strict discipline of the high school was absent. Together with the change in our environment came a corresponding change in our inner selves. Responding to the new freedom, a sense of responsibility grew upon us. It marked the metamorphosis of the carefree prep school student to the college man, going to school for a purpose, with an aim in view. Responsibilities had fallen on our shoulders and we settled down to meet them.

While actually more difficult than the first, the Sophomore year found us more prepared. The formation of habits of study and familiarity with routine procedure aided us in performing more efficiently. Then too, the introduction of subjects in the chosen field, as well as in the general field of engineering brought us a keener

interest in our work. Outside activities began to engage our attention, helping to broaden the scope of our interests.

The Junior year, delving seriously into real engineering work, was the most fascinating year yet. It was not a year, as rumor had it, to sit back and relax, but one in which work was done and results attained. It was a social year too, in which real friendships were made and a closer touch established with the fellow members of our own departments. Junior Week and the Prom climaxed this pleasant year.

The Senior year—gone before it was well started. Laboratories and reports engaged a good deal of our attention. Economics, law, public speaking, and business administration! These subjects so essential to the well rounded engineer's education formed an important part of our curriculum. Smokers, banquets, and outside interests, all contributed to make this our busiest year.

To-day, after having completed our course, we find our intellect more balanced, our ideas more advanced and we look upon our chosen field in a different light. The field of engineering is much too large for any four year course to more than present the foundations in physics and mathematics, and to give the elements of the engineering work. As we enter the practical field of engineering we know that again we must make a beginning, again we must start, this time from a higher level, and learn the specialized work that is to be our own. Armour has taught us the way to study, how to make the most of our time and we have formed study habits that will help us. The door to a higher knowledge has been opened to us, shown us what we want and how to find it. Our future progress depends on our own ability.

HONOR EDITION AWARD

Each year it is the custom of the Armour Tech Athletic Association to select from the Senior Class the ten most outstanding men who have contributed the most to their school in leadership, activities, and scholarship. To these men the A. T. A. awards a special numbered copy of the Cycle.

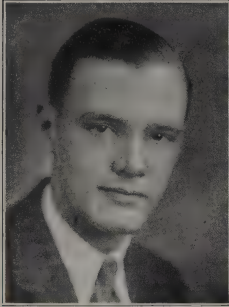

The selection of the Honor Seniors is made by the executive board of control of the Association which is composed of the following individuals: the Deans, Director of Athletics, four members of the faculty, five student representatives.

In determining the point score of each man in the Senior Class his activities throughout his four years at Armour are considered. For each activity or sport he is credited with a certain number of points. The twenty men who have the highest point total are then listed. From this list the ten Honor Seniors are selected.

Social Chairman.....	B. G. MC LAUGHLIN

For three years the members of the class of '31 have been preparing themselves to fit their chosen vocation. A sound foundation has been laid upon solid bed rock which was reached by digging to the bottom of the school work, thereby mastering the basic fundamentals upon which engineering rests. However, the class as a whole realized that mere technical training was insufficient for material success, so the men diversified their efforts to include the athletic, literary, and social activities of the school.

In athletics the men have been especially active as they have already carried off an interclass baseball championship and track meet. Then give any of the varsity teams a moment's attention and you will be surprised by the great number of regulars by which the class of '31 is represented.

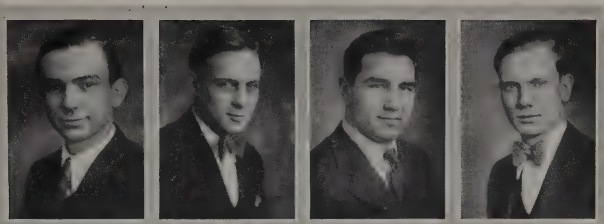

This class has also shown that a student in engineering can also become highly proficient in another line, as evidenced by the staffs of the Institute publications. Here you will find a large number of men working, cooperating, and striving to make the publications a success.

Others of the class are active in the musical organizations, engineering societies, clubs, and fraternal organizations.

Mere work and the pursuance of technical training are not satisfying; contentment

To be sincere and a "woman hater" is a virtue longed for by many but possessed by few. How about it?

STEHNO

McLAUGHLIN

is achieved by that added sparkle, that indispensableness of college life, the social activities. January 17, will be long remembered as the date of the Junior Informal. The other dances, including those sponsored by the other classes, also received the junior support. It is here, at these social functions that the embryo engineer leaves his sphere of cold facts, to enter another sphere, the land of play, where life is—LIFE.

The Prom, which was held during Junior Week, was one that will be remembered as a fitting climax to the school's social activities. It was here under the soft lights, soothing music, and general comradeship, we were finally convinced that after all school life was real life. Then too, the other events of Junior Week were, as everything else propelled by the class of '31, a roaring success; making this week another marker towards the general enjoyment of our third year at college.

Although it is true that the presence of any individual class has very little relation to the success of the Institute, yet it is equally true that each upper class has its influence. May ours be remembered for its unusual participation in school activities and its amiable fellowship.

You would never think he was a preacher if you could see him at one of the famous pajama parties he attends.

Determined in every way that the class of '32 should be more than just a class, the feeling of responsibility and action characteristic of our first year was carried over and strengthened in our sophomore year. Secure as noble sophomores, our policy of "walk softly and go far" had much to do with the successful year just completed. We young Spartans passed the edge of darkness, of freshmanhood and rose steadily in the past year.

Returning to Armour in the fall of '29 we saw a change in our men. The summer had seen our Fire Protects spread around the mid-west from Minneapolis to Nashville; from Denver to Cincinnati; our Civils laboring at Trout Lake, Wisconsin; our Mechanical, Electrical, and Chemical engineers in the various manufacturing plants thruout the country, learning the technique of their work; and the lucky few "engineers to-be" just vacationing.

Being an unusual class we held no fear of calculus, physics, and mechanics, the subjects so terrifying to sophomores. In fact, we proved with our slipstick that $2x2=3.998$. However, we had other things to do, bigger and better. Although we hated to leave our log tables, we wholeheartedly supported all social and athletic events of the year.

Funny what spring makes a fellow do and
think, isn't it, Bill?

How about the I. C. station to-night?

LIND

DIRKERS

JACKSON

BRYANT

Perhaps entering the Institute in leap year was the strange influence, nevertheless, the hardened engineers became Romeos the evening of the Sophomore dance, Friday, February 28th, 1930. The Gold Room of the Congress Hotel, ultimate in dance floors, was the scene of our big social event.

Not only socially but in athletics as well did the class of '32 prove itself distinctive. The Varsity basketball team boasts of a sophomore letter man while the baseball and track teams were greatly assisted by our classmates who gave their services. Minor sports, especially swimming and boxing saw many of the class of '32 actively engaged.

Armour publications received considerable attention from the sophs who ably held responsible staff positions. We are by no means thru yet. We plan to keep the class of '32 at the top thruout our last two years at school.

Our short two years at Armour has strengthened the bond of friendship between us. It has developed a deep feeling of loyalty, love, and honor to our school and to our classmates. One may truthfully say that the class of '32 has done well. Indications are that we will follow the high ideal in our remaining years in school. To our next two years we look with pleasure, with determination to uphold all honor; nothing daunts us, for we are the class of '32.

A politician from the start but not crooked
even if he is a civil.

OFFICERS

R. W. CARLSTROM.....	President
T. D. LUCKETT.....	Vice-President
B. C. SCOTT.....	Secretary
W. W. DAVIES.....	Treasurer
R. O. BELFORD.....	Social Chairman

The two-hundred and fifty freshmen, who swept thru the portals of Armour last September, were carefully selected from some seven-hundred applicants. Being a select body, Armour expects much from them in scholarship, athletics, and citizenship.

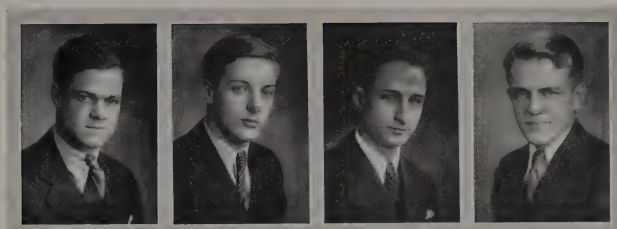

Bewildered and feeling out of place in their new surroundings, the first business meeting of the class of '33 was chaotic. However, this gave them a chance to show their mettle, and quietly out of the excitement and misunderstanding emerged order. The election of class officers was conducted in a systematic and peaceable manner. R. W. Carlstrom was elected to the presidency, T. D. Luckett became vice-president, W. W. Davies, treasurer, B. C. Scott, secretary, and R. O. Belford, social chairman.

The first social gathering of the class was the Freshman Handshake conducted under the supervision of the upper-classmen. This served not only to bring the freshmen and the upper-classmen together, but it bound the freshmen closer and many new friendships were formed that night.

The new men were defeated by the sophomores in the inter-class baseball tournament with a 7-0 score. When the inter-class basketball season opened, the fresh-

How about taking a chance on a duck—six feet under water. You ought to get it.

LUCKETT

SCOTT

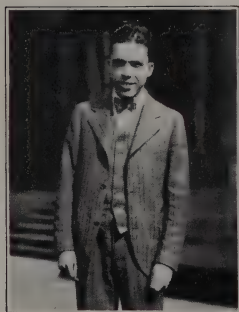

DAVIES

BELFORD

men slapped back by defeating the confident sophomores 8-6. Even the juniors fell defeated under the terrific onslaught of the dauntless freshmen team, surrendering the inter-class basketball championship to them.

Little is really known as yet of these dark-horse members of the freshman class. The few glimpses that have been caught of them seem to predict that when June, 1933, comes around, Armour will be losing one of the best classes ever to have sojourned four years beneath its roof. They have men on the boxing and the swimming teams who have already shown promise of bringing home some championships to Armour. There is a wealth of track material present, and judging from the fine work they did in the inter-class basketball contest, many men should play on the Varsity next year. The Armour Tech News, the Glee Club, and the Orchestra, are already benefiting from the work of these new men.

The freshmen of today are the seniors of tomorrow. Armour appreciates the gallant record made by them thus far, and looks forward to seeing great things achieved in the next three years by the class of '33.

A truce with Morpheus is a handy thing to have, don't you think, Harold?

SENIOR INFORMAL

What a thrill, especially for those with the knowledge that they are on the last lap of their college race, attends the first informal dance of the year.

We throw out our chests and clasp her arm tighter as we enter that favorite of Armour men, the Palmer House, and hear the announcer holding forth thus: "Express elevators for the Red Lacquer Room, Armour Institute of Technology!"

It seems that thrills are everywhere tonight, the 6th of December, in the heart, in the feet, and by one's side, as Waddy Wadsworth begins to smile and wave his magic wand.

And then, as the grind of school-work is forgotten, and only the sunny side remains, we enjoy ourselves to the utmost, and as the end of the evening draws on, we say: "What a Class! What a Girl! Waddy Band!"

JUNIOR INFORMAL

ACT I—Scene: Outside the Blackstone Hotel on the evening of January 24th, at 9:30 P. M.

A limping engineer and a friend, with their consorts, meet.

Friend: "What business bringest thou here this balmy evening, friend?"

Engineer: "Thou knowest of the epidemic of that dread plague, 'Dancitis,' raging at dear old Armour these many weary weeks, dost thou not? Our divinely appointed one, Sir Berlyn, hast, after trial and tribulation, secured the services of that famed specialist, Doctor Harold Leonard, who shall, this evening, pit himself against this malady in a noble effort to preserve us unto our great destinies.

ACT II—Four hours later.

Bulletin: Sir Berlyn announces that the operation performed by Doctor Leonard and the assisting surgeons was highly successful. The patients, though utterly exhausted, are resting easily, and appear to be on the road to complete recovery.

SOPHOMORE INFORMAL

Long in the memories of the class of '32 will the date of Friday, February 28th, linger, for that was the date of the third dance of the year, the Sophomore Informal.

What a dance! What a night! Social Chairman Bryant and his committee had secured Erl Brammel and his Kentucky Colonels, masters of jazz and syncopation, who made merry in a way all their own and satisfied every desire for a wonderful evening.

And where, you ask, did all this happen? You guessed right, my friend, for where except in the beautiful Gold Room of the Congress Hotel could such an evening be spent?

A most enjoyable and unusual feature was the spaciousness of the ballroom and the abundance of parking space between dances. The programs were unique and worthy souvenirs of such a dance.

FRESHMAN INFORMAL

Just as a woman usually has the last word in love or in war, so the Freshman wait until the other classes have had their fling at informal dances, then they step out and flash across the line inches ahead of the field.

As one member of an upperclass social committee was heard to say, "Who couldn't give the best dance of the year when the birds are singing and the moon makes us wax poetic, instead of having to plow through four feet of snow?" But, professional jealousy aside, such was the night of April 25th, as New-Dale and their Florida Revellers swung into action in the Louis XVI Room of the Hotel Sherman. Certainly no one, watching the peculiar antics of that hilarious crowd of first-year men, and their partners, would have dared suggest that they were just a year removed from their prep days.

Chairman Belford and his cohorts left no particles of petrified mineral matter unturned in providing the embellishments tending to produce violent auricular and pedal palpitation.

INTER-HONORARY DANCE

The Inter-Honorary Informal! Who wouldn't be proud and happy to have the privilege of attending this dance, accorded only to those who have attained membership or pledgeship in the various honorary fraternities at Armour?

On the evening of Friday, May second, just as 'most of the seniors were beginning to wish they had more than a scant month remaining of their college life, this annual Inter-Honorary fling was given in the exquisite Dutch Room of the Bismarck Hotel.

Soft music, soft lights overhead, the softest lights in the world gazing into one's eyes. Then, rousing quickly from this pleasant lethargy at the sudden quickening of tempo, as hold sway, our hearts are filled with joy, and at the same time, sadness, at all this pleasure and companionship so soon to be left behind, though perhaps not behind, as the numerous alumni present testify. And so endeth the evening, to be remembered yet mahy a day hence.

JUNIOR FORMAL

May 16
8 P. M.

Dear Diary:

Tonight's the night I've been waiting and planning for so long, Prom night! Dick has taken me to all the other school dances this year and I've come to love 'em so. But I was so afraid he wouldn't ask me to the Prom, because I know what the Prom means to these proud young Armour fellows. The girl must be just the perfect Prom Girl, and oh! what a thrill when he asked me! Dear Dick!

Oh! There's the dear boy at the door now. Dear Diary, I'm all a-flutter inside, and I'll finish this when I get home.

3 A. M.

Dear Diary:

What was that meaningless chatter I was writing of the Prom before I left? The combination of the Congress Hotel Gold Room, Del Lampe's band, the glorious dinner and favors, and Dick in his "Tux," was just more than I can describe! Oh Dear Diary, will I ever wake up?

SENIOR BANQUET

Who would miss the Senior Banquet, the last grand fling of the class before we pack our books away and make our debuts into the business world? Certainly, if we "didn't have time to attend," we would have a queer, unpleasant feeling way down somewhere, years from now, that we hadn't quite topped off our school career with the finishing touch.

The hard parts of our respective courses, and the fact that we worked pretty hard at times, will be forgotten in the years to come, but when two old grads get together, the first thing they say, after the "How's the wife and kids" are over, is, "Remember what a time we had at our Senior Banquet, Jim? Gosh, I'll never forget that night."

Ray Shoen surely didn't intend to have the seniors of 1930 forget their Senior Banquet, and accordingly provided for a wonderful evening. After a few hours of good food, songs not so good, de luxe stories, a la John, and other forms of merry-making, at the Medinah Athletic Club on the evening of May 20th, the only ones envied by the seniors were those who still had their Senior Banquet to look forward to.

SENIOR RECEPTION—1930

Plans for this year's Senior Reception indicate that the affair will be much more extensive and entertaining than ever before. Doctor Raymond intends to give the departing seniors an evening's entertainment calculated to make them wish they had the last few years to live over again.

The seniors and their lady friends will be the guests of the President one evening of the first week in June. Music will be a headliner on the evening's program, as Doctor Raymond will present an unusual attraction in the form of a trio from the Chicago Symphony Orchestra, which will give several selections of the type of music for which they are famous.

Another type of music will be heard, a la Guy Lombardo, in the gymnasium, where those who wish to may dance to their feet's content, or until the band plays "Home Sweet Home."

The rest of the evening will be taken up with the consumption of refreshments, and the cementing of friendships made in the last four years, with the hope that they may continue in the years to come, ties stronger than iron or steel, binding them, as a class, to the old school.

JUNIOR WEEK, 1930

Junior Week, the one week of the year when school activities are more important than the daily grind; the week when baseball, tennis, track, banquets, music and the Prom, reign supreme.

The honor of opening the week's festivities fell to the baseball team, which measured the Alumni for a full-length pall and stand-up coffin to the sad tune of 10 to 2 on Monday afternoon.

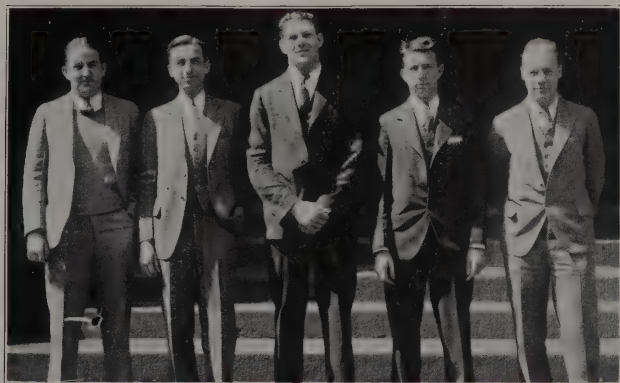

On Monday evening, school work again claimed our attention for a short while, the occasion being Open House Night. All the shops and laboratories were humming busily, possibly, quite possibly, a bit more busily than usual.

Wednesday afternoon saw the usual victorious tennis team go down before the strong racket-wielders from Michigan State Normal College in a thrilling match.

The musical climax of the year occurred the same evening with the presentation of the Annual Spring Concert in Mission Hall. The program was full and varied, including numbers by the Band, Orchestra, Glee Club, and also the eagerly-awaited and bitterly contested Inter-Fraternity Sing, won by the Triangle Fraternity.

For the Juniors, the highest point in the week's activities came on Friday evening, when they gave their Promenade in the Balloon Room of the Congress Hotel.

Saturday—Circus Day—and of course the day the weather man would develop a grudge against Armour's doings. Had a poet been at Ogden Field he could have written one of those melancholy masterpieces of the lowering skies and the cold grey mist.

As the time for the Freshman-Sophomore Sack Rush drew near, there was consternation in both camps. The Frosh had been crowing all day over the fact that they had succeeded in abducting the Sophomore leader, Frank James. James, however, managed to reach the scene in time to lead his army into battle. But the wiser sophomores merely seized Maynard Venema, the Freshman leader, at the gate to Ogden Field, shoved him into a car and roared away at full speed.

The combined facts that the Freshmen needed no leader, and the Sophomores had not learned the lesson of numbers, brought victory to the green-shirted warriors.

Next came the Fraternity Pageant, the various stunts being unique and excellently performed. Phi Kappa Sigma's presentation of "A Faculty Banquet" was judged the winner of the Circus Day Skin by the judges and spectators.

SUMMER CAMP

SUMMER CAMP

On the evening of June 7th, the majority of thirty-two Civils boarded the "Fisherman Special" at the Union Depot. The next morning we arrived at Minocqua and, from there traveled by bus to State House.

Grouped about the magnificent depot which consisted of a small platform of weather bleached boards, some white letters spelling "State House," and nothing else, 'twas here we waited for our baggage. Galloping up the track, swaying from side to side, came the wonderful Boulder Junction Limited. It usually ran only on Tuesdays and Fridays but made a special trip this time to deliver the baggage. Once seen, it cannot be forgotten. Thereafter on Tuesdays and Fridays, if one was working near the track, he anxiously waited to see it go by with a caboose and a possible car or two.

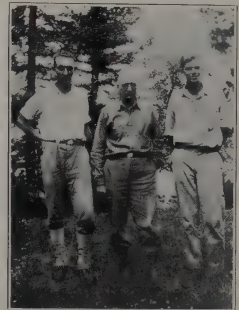

The next move was to hike to camp. After a general survey of the vicinity of camp, tents were given out, four fellows to a tent, and baggages, some whole and some not so whole, were dragged up-hill to where the tents were located. By Saturday evening everything was ready for a six week's stay.

Work began Monday morning at seven A. M. with parties of two being sent out to tape distances. The three instructors, Professors Wells, Heald and Mr. Jaris, walked around from group to group seeing that the work was performed in the right manner. Quite a number of groups were advised against having a tug of war with the tape.

The rest of the six weeks was spent in measuring angles, triangulation, locating bridge piers across imaginary rivers that often went up and down hills, measuring areas, taking topography, land survey and railroad location.

There was plenty of time left over after the day's work and on Saturday afternoons and Sundays. Of course, there were notes to fix up and, at times, a whole evening was used in trying to have them ready before eight o'clock.

After a hot day in the field many would change from boots to bathing suit, if any, and run down to the lake to cool off.

Later Saturday afternoon, a number of embryo engineers tried the art of pressing. In the dining room of the mess hall, under the guidance of one of the cooks, we sponged and then put knife edges on our city clothes. After dinner a truck, sent by the owner of the dance hall at Trout Lake, arrived and carried off the Beau Brummels to win and break the hearts of the fair ladies of the district.

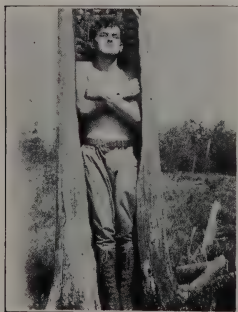

The others, who remained behind, after scoffing at their society minded brethren, spent the evening rowing, fishing, playing checkers, or writing letters. There were very few fish caught until the last two weeks, when fish appeared on the table almost every meal. On June 12th Dean Palmer and six other professors dropped in for a visit, bringing with them about thirty-seven pounds of fish and a number of fish stories.

With extra time on their hands, the engineers invented fire drills. At certain signals buckets of water were emptied on anyone who was not expecting it. They usually took place before the ten o'clock curfew and ended up with empty pails and wet pajamas.

On the Sunday preceding the Fourth, a new form of entertainment was provided. To celebrate a birthday, one of the fellows was carried down to the lake and out on the pier. Somebody came up from behind and the bearers and their burden all landed in the lake.

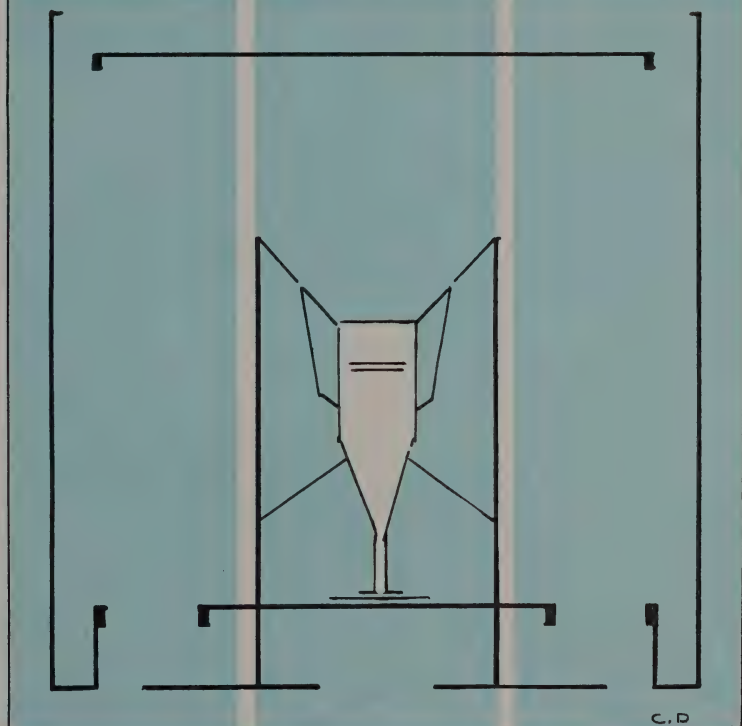

On the Fourth of July most of the fellows spent the day away from camp. The largest group found its way to Sayner. Others hiked to various lakes and spent the day fishing. Almost every Sunday somebody hiked up to Boulder Junction. Each day however there was one trip made to Trout Lake to replenish the camp's supply of candy and tobacco.

After the six weeks were over the tents were taken down and stored away. We then boarded the Boulder Junction Limited and proceeded to Minoqua, where we caught the "Fisherman's Special," and on the 21st of July a pack of wild and sunburned Civils poured into the Union Station.

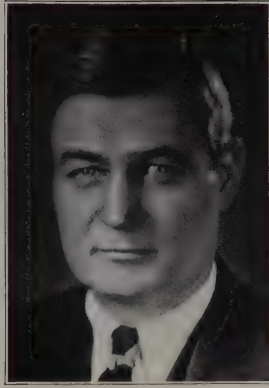

ATHLETICS

C.D

J. J. SCHOMMER
Director of Athletics

Develop your body as well as your mind. Become interested in spending part of each day out in the sunshine; go for long walks or learn to play a game like tennis, golf, or volley ball; or take up one of the major sports like track, baseball, and basketball. Watch your "belt line" by activities in physical culture. Your "belt line" is your "health line." My plea is ever: keep the doctor away, participate in some athletic activity.

W. K. SIMPSON

ARMOUR TECH ATHLETIC ASSOCIATION

A group of students, in the spring of 1922, foreseeing the need for student representation in school affairs, organized the Armour Tech Athletic Association.

The object, in the constitution, brings out very clearly the purpose of this organization in school affairs. In brief, this is to develop a unified Armour spirit, systematize all interclass relations and privileges. It serves as a medium between student body and faculty. It has full privilege of investigating the management of any student activity, fostering mass meetings, promoting inter-fraternity athletics, stimulating interest in athletic contests, assisting the athletic department in arranging schedules, receiving and caring for visiting teams, and directing and managing all affairs which properly fall under such an organization.

The management of the A. T. A. rests with the Board of Athletic Control, which consists of the college executives, three members of the faculty, the officers of the A. T. A. A., a representative of the Freshman class and a finance committee.

The organization has brought about many desirable changes in the school.

For the last three years it awarded ten Honor Cycles to the ten outstanding men of the senior class upon graduation. Scholarship, activity, and personality were the deciding factors in choosing these men.

BOARD OF ATHLETIC CONTROL

The Board of Athletic Control is the guiding hand of Student Activities at Armour. It controls, fosters, and sanctions all School Athletics, publications, and musical organizations through the medium of the A. T. A. A.

The Board is made up of the President of the Institute, the Treasurer, the two Deans, three faculty representatives, the officers of the A. T. A. A. and a representative of the freshman class. On account of the dual faculty and student control, a fair and impartial decision can be reached in all matters pertaining to student activity.

One change occurred in the Armour coaching staff during the 1929-30 season. "Sonny" Weissman was appointed to the position of boxing coach. Under his tutelage the boxing team K.O.ed a hard schedule.

In spite of longer and harder schedules than ever before the athletic teams representing Armour enjoyed the most successful season in history.

Too much credit cannot be given the coach of a successful team—and Armour's teams were successful.

"Lonnie" Stagg coached the tracksters to a most successful indoor season. The team won six indoor meets.

Baseball, under the direction of Krafft, experienced one of the most successful seasons in the past fifteen years at Armour. The apple "tossers" won thirteen out of fourteen contests.

The Honor "A" Society was founded in the spring of 1914 and is one of the oldest existing organizations at Armour. It organized originally as the governing body of athletics at Armour being supplanted in that capacity by the Armour Tech Athletic Association, and now exists as a society to promote athletics and to bind the letter men together. As a mark of distinction on the campus the members wear small gold "A" charms.

Two Armour Athletic Reunion banquets were held during the past year. The first was held at the school cafeteria after the Alumni baseball game and the second at the Delta Tau Delta House after the Alumni basketball game.

BASEBALL

COACH KRAFFT

BASEBALL 1929

WILLIAM KRAFFT	Coach
ABEL GENT	Captain
WILLIAM H. BERRY, JR.	Manager

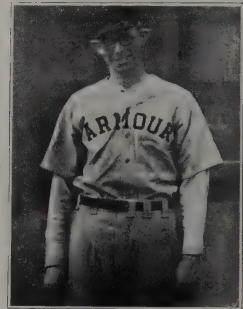

With a large number of letter men and several promising freshmen answering the first call for practice the baseball situation looked promising. The catchers and pitchers had been working out for several weeks before outdoor practice started and were in the pink of condition.

Simpson and Stehno, the two veteran mound stars could be relied upon for consistent hurling. A powerful infield composed of Robin at first, Reichle at second, Weldon at short, and Abe Gent at third outshone the infield combination of the year before.

Armour's "murderers' row" consisting of Hauser, Jennings, and Anderson, patrolled the outfield.

Living up to preseasonal predictions the team won 13 and lost only one game. Some of the best college teams in the middle west were met and defeated. Armour proved that in one sport at least she is the equal of any College or University in the country.

In the first game of the season Armour met and defeated Crane College 4-3. The game was played on April 11, a cold dreary day that threatened rain every minute. Only a seven inning affair, Simpson and Stehno did the hurling for Armour and Larsen and Wrobel for Crane. The team played indifferent ball in the field but hit in the pinches.

MGR. BERRY

On the sixteenth of April the University of Chicago was turned back 5-4. Simpson pitched the full game allowing but three scratch hits and fanning seventeen men. Armour almost lost this game on errors, but Simpson put the affair on ice with a triple in the ninth with a man on second. The last three men to face him in the ninth fanned.

Stehno turned back the Chicago Normal boys with one hit as Armour won the next game three to nothing. Again timely hitting by the pitcher drove in the runs.

Simpson was again on the mound when Lake Forest was defeated 5-3. In this game Simpson struck out 18 men.

On April 26th Luther College, undefeated for three years, took the short end of a 4-1 count. Keyed for this game, the Armour boys played errorless ball and delivered hits when hits meant runs. With his fast ball and hook working perfectly, Simpson allowed but five scattered hits.

CAPT.-ELECT SIMPSON

WELDON

CAPT. GENT

The next day Y. M. C. A. College was overwhelmed 17-1 at the University of Chicago. Stehno held them helpless for seven innings and did not allow a man to reach first. Graham and Cannell finished the game and "Y" College finally got a solitary hit and run.

The De Kalb game proved to be another track meet when Armour won 24-11. The engineers gathered nineteen hits in this game and everyone but the bat boy saw action.

On May 8th Stehno added another to his string of victories when Northwestern was defeated 7-6. In this game Link was injured and laid up for the rest of the season when a man slid into him at home plate. A ligament in his left leg was torn loose and it was necessary to rush him to the hospital. Link was the mainstay of the backstoppers and his loss was keenly felt.

STEHNO

REICHLE

LINK

Michigan State Normal was the next victim at a score of 5-3. Simpson had his strikeout ball working perfectly for this game and twenty-one of the teachers vainly waved bats at his hooks.

The alumni were gently let down ten to two. John Schommer tried to pitch a bit but his hurling activities reminded one of a creaky windlass badly in need of lubrication. It's strange how quickly the alumni deteriorate after leaving the sacred portals of dear old Armour. It doesn't seem possible that studies kept them in condition.

The seventeenth saw another victory for Armour. Michigan State Normal was again defeated 5-1. The Armour batsmen gathered twelve hits in this game. King, the Michigan State Pitcher gathered the three hits made off Simpson.

TAYLOR

YOUNT

« « CYCLE « « 1930

The only defeat on the schedule came when Luther trimmed the engineers 7-1 at Decorah, Iowa. For this game the team went into the proverbial slump and played a game that would have done credit to a bunch of slow motion artists. Simpson pitched with a dead arm and was nicked for twelve hits.

The next day at Watertown the bunch suddenly snapped out of it, played bang up baseball, and clouted the apple to all corners of the orchard. Northwestern was the victim and meekly took a twenty-three to two trimming.

In the final game of the season it was only necessary to go through a few motions to trim "Y" College 7-1.

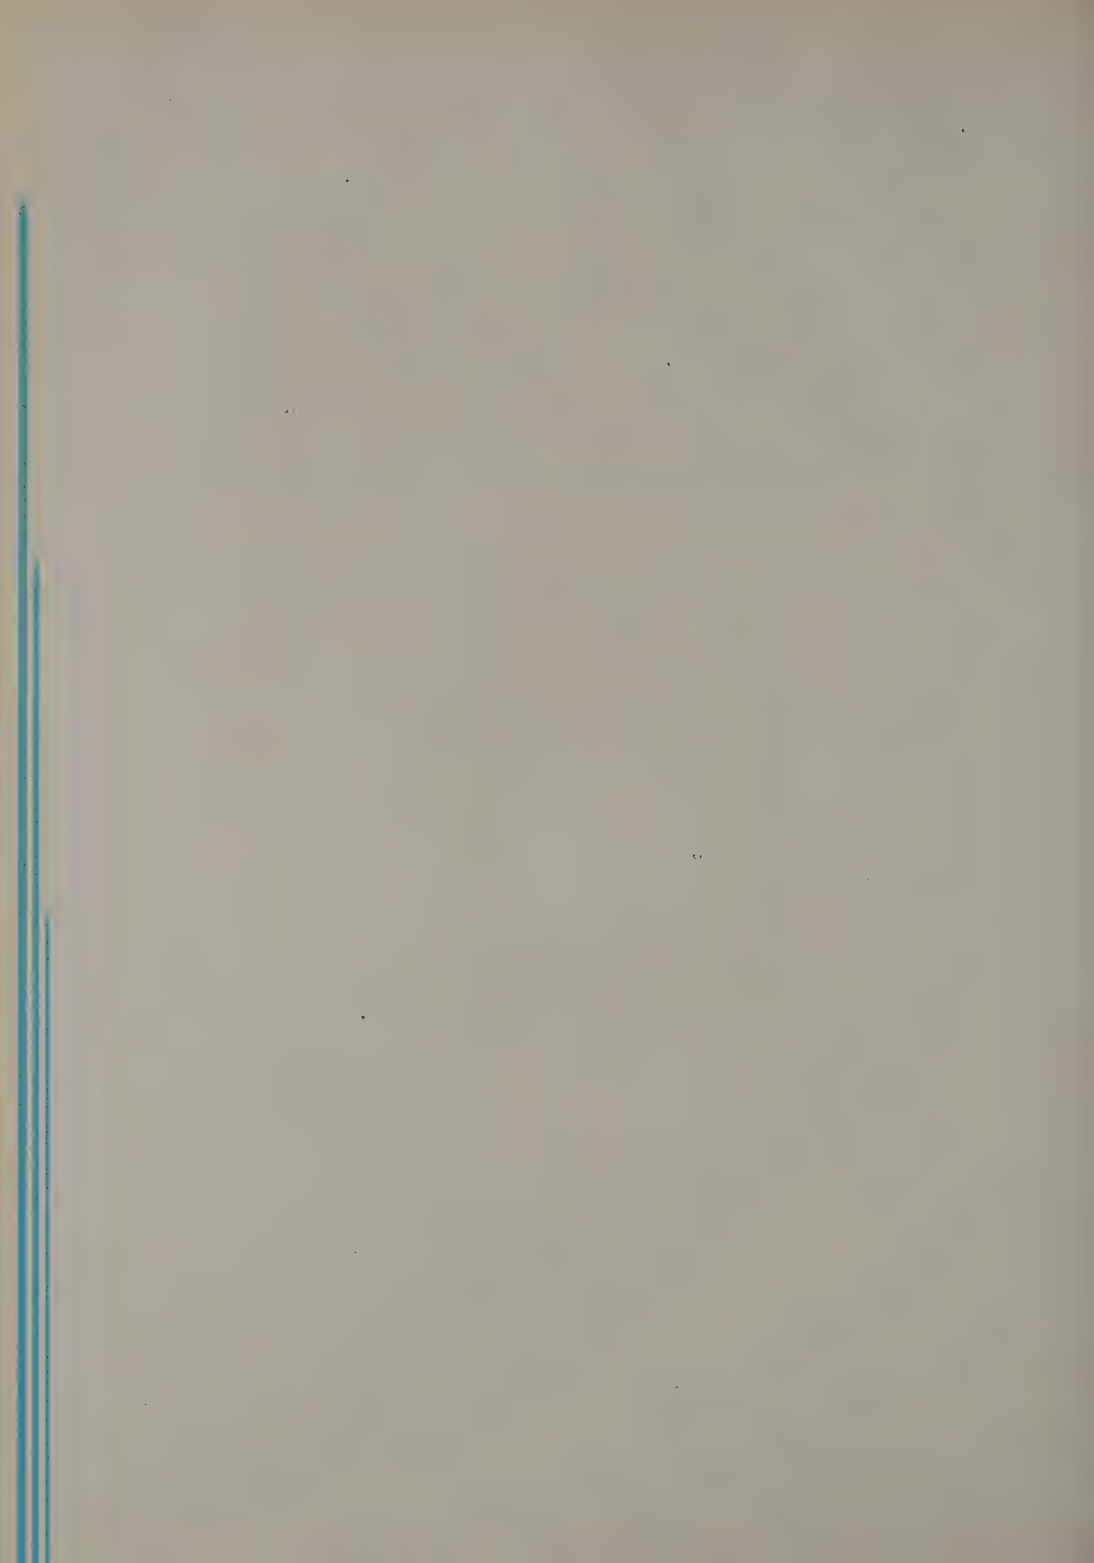

So ends the story of the most successful season in Armour's baseball history. Have we got some baseball tossers? Well, I guess!!

COACH STAGG

TRACK 1929

ALONZO A. STAGG, JR.....	Coach
J. J. KARA.....	Captain
W. B. GREENE.....	Manager
WILLIAM HAFNER.....	Asst. Manager

Graduation dealt a disastrous blow to the track squad. Loss of Captain Deiwert, F. D. Payne, two-mile star; M. B. Tracy, crack sprinter; and R. N. Brown, Armour's lone pole vaulter, left the track team in a woefully weak condition. These men are among the best in Armour's track history, each holding the school record in his respective events, Deiwert in the half and the mile, Payne in the two mile, Tracy in the century and 220, and Brown in the pole vault.

Cross-country in the fall failed to draw any men and it was necessary to cancel all meets.

The team started intensive training indoors at the University of Chicago about the middle of December. As usual, the team was woefully weak in the field events. The only redeeming feature in this branch of the sport was Don Paul, one of the best shot putters in the country.

The initial event of the season was the First Annual Armour Institute of Technology Invitation Track Meet held at Bartlett Gym. Over one-hundred athletes competed in this meet. By taking eight first places out of eleven events, the University of Chicago track men easily won. The feature event of the afternoon came when Don Paul heaved the 16 pound shot 45 feet 8 $\frac{5}{8}$ inches to shatter the Bartlett Gym record.

May 17th—Wheaton 63, Lake Forest 55, Armour 36.

May 20th—Crane 76, Chicago Normal 25, Armour 53.

MGR. GREENE

In the first dual meet of the year Chicago Normal was easily turned back 45-32. The mile event proved to be an upset when Richter, a freshman, led the field from start to finish winning over more experienced men. Captain Kara chalked up another first for Armour in the high hurdles. Sturm copped a third in the fifty, Fox and Doubt took a first and third in the 440. Armour made a slam in the shot put with Yount taking first place. In the half-mile race, Iverson and Podlizec placed first and second. Yount took third in the pole vault, and Henry Fox and Kara tied for third in the high jump. Armour copped the relay with Harold Fox, Yount, Sturm, and Ransel running in the order named.

On March 21st Armour placed third in a quadrangular meet with Chicago Normal, Morton, and Crane. Crane College entered at the last minute turning the affair from a triangular to quadrangular meet. Crane came first with 57, Chicago Normal second with 46, Armour scored 32, and Morton 18 $\frac{3}{4}$. Coach Stagg was not interested in winning the meet as he sought to save his more valuable men for the C. A. A. U. meet the following day. Don Paul won the shot put with Yount placing second. Smith headed the mile runners while Harold Fox copped the 440-yard dash. Richter, Iverson, and Henry Fox finished third in their events. Sturm placed fourth in 220-yard, and 50-yard dashes.

At the 31st Annual C. A. A. U. meet at the Broadway Armory on March 22nd, Armour tied for fourth place with 5 points. Fifteen teams competed in the track and field events. Failure to bank the turns interfered greatly with the marks made

by the men. Don Paul placed second in the shot put, the winning heave of 49'6½" being made by Schwartz of the I. A. C. The medley relay team consisting of Kara, in the 220, Sturm in the 440, Iverson, one half mile, and Richter in the mile, placed third.

The team placed second in the triangular meet with the University of Chicago second team and Sears Roebuck Y. M. C. A., April 10, at Bartlett Gym. The scores were as follows:

Sears Roebuck "Y"	39
Armour	35
Chicago	29

Sturm placed fourth in the fifty-yard dash and Kara copped a third in the hurdles. Sturm and Harold Fox placed first and second in the quarter, while Iverson and Podlipec placed first and second in the half. Armour failed to place in the mile, Smith taking a third in the two mile. Yount and Paul placed third in the pole vault and high jump respectively. Don Paul again broke his Bartlett Gym record in the shot put with a heave of 45 feet, 10¼ inches. Yount and Kara placing second and third.

Armour won the first outdoor track meet of the season by defeating Y. M. C. A. College 77-49. The meet was held at the "Y" College track. Sturm took individual honors by taking first in the 100, 220 and 440-yard dashes. Armour won all three places in the 880, mile, and two mile runs. Podlipec won the 880, beat-

STURM

JAMES

TIMMERMANS

ing Timmermans by a foot, while Doubt trailed third. James won the mile with Smith second and Richter third. Smith lead the two milers and Jillson won the 220-yard low hurdles. Paul and Yount placed first and second in the shot. Ransel, Harold Fox, Montesano, Goldman, and Cordes finished second in their respective events.

Don Paul, Armour's sole representative at the Drake Relays held at Des Moines, Ia., on Friday and Saturday, April 26 and 27, failed to put the shot far enough to place. He finished just outside the money in the finals, taking fifth place.

In a triangular meet with Lake Forest and Wheaton on the seventeenth of May, Armour placed third with 36 points. Wheaton was first with 63 points and Lake Forest second with 55. Paul of Armour was high point man with three first places, capturing the shot put, high jump, and discus throw. Sturm took first in the 220 and fourth in the century and 440.

The triangular meet with Crane College and Chicago Normal at Stagg Field ended the outdoor season. Crane placed first with 76 points, Armour second with 53, and Chicago Normal trailed with 25 points. Paul was high point man again by winning first places in the discus and shot put. Timmermans and Doubt ran first and third in the 880. Richter copped first in the two mile, while Smith and Montesano took second and third. Sturm placed second in the 220 and 440 and fourth in the hundred. James and Iverson placed third and fourth in the mile. Cordes and Farrell placed first and second in the javelin.

BASKETBALL

COACH KRAFFT

BASKETBALL, 1929-1930

WILLIAM C. KRAFFT.....	Coach
W. KING SIMPSON.....	Captain
HENRY FAULTSCH.....	Manager
EDWARD ERLAND.....	Assistant Manager

The basketball squad enjoyed their usual mediocre season. The team, after repeated setbacks, checked up a final score of five games won, and ten games lost. The team seemed to lack the last minute drive so necessary for victory in a close game. To use Coach Krafft's words, "The Armory is a 'Morgue' unless filled with cheering students.

A large number of candidates turned out for the team at the beginning of the year but these thinned down to about 15 men who finished the season.

The first game of the season with the Alumni ended in victory for the varsity. The slightly rotund, slightly bald, somewhat short-winded alumni took the short end of a 37-17 score. Otto Kuhn of Automotive Lab. fame garnered most of the alumni points. After running up and down the floor once or twice Otto was so exhausted he stood under the basket and made several sleeper shots. Billy Downes showed the boys a bit of speed, and Vic Hofer gave a demonstration on how not to foul a man. Simpson profited by Vic's antics to the extent of nine charity tosses. Most of the squad saw action in this game. One of the alumni wanted to know if they were playing Notre Dame.

MGR. FAULSTICH

The second game of the season was lost to Chicago Y. M. C. A. 25-18. The boys had an off day and played listless basketball.

The next three games ended in victory for the Tech squad. Chicago Normal, McKinlock Campus, and Wheaton were the victims.

Wheaton was defeated 21-15, the team playing much better basketball than against "Y" College. The score at the half was 9-9. The second half was a different story with Simpson dropping baskets from all positions and angles. Simpson led the Armour men with four baskets and three free throws. Tillman led Wheaton with 5 points.

The Tech squad trimmed Chicago Normal in an overtime period 28-23. Armour led by five points at the half. During the second half Chicago Normal slowly pulled up and with a few seconds to play led by one point. On a double foul Robin dropped his free throw while the Normal man missed. Rowley opened the overtime period with a bucket from mid floor. Robin then added two short shots by some clever floor work and Ott tossed in a free throw. Normal got two charity tosses as the period ended. Robin was high point man with five baskets and two free throws.

CAPT. SIMPSON

ROBIN

MIRAN

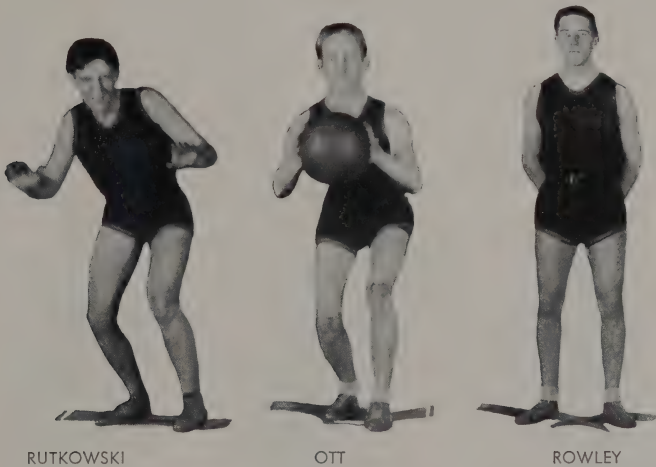

Northwestern of McKinlock lost a close game to Armour, 24-22. The game nearly became a calamity when Armour let an eleven point lead dwindle to a solitary point, late in the last half. With Rutkowski, Armour's tower of defense removed, on fouls, Northwestern had little difficulty in scoring.

From this time on a "jinx" seemed to follow the team. Game after game was dropped, many of them by close scores.

At Rock Island the team met a fast quintet representing Augustana and were defeated 40-29. Northwestern Teachers were again nosed out by two points, 24-22.

Playing the worst brand of basketball possible the Tech squad was defeated by Chicago Normal 19-8.

De Kalb teachers then defeated Armour in two games, 33-26 and 24-23. In both games Armour held a comfortable lead at the half, only to be "nosed out" in the final minutes of play.

Another "sure" game was lost in the final minute of play when "Y" College quintet turned back the Armour boys 31-28.

Fighting mad, the boys came back in the next game against Augustana and fought from the starting gun to the final whistle. Although they lost, 27-21, it was to a stronger, bigger, faster team, that was extended to the limit to win.

The next two games against Michigan State Teachers and St. Mary's were played on a week-end trip to Michigan. A powerful quintet from St. Mary's defeated them 42-27. Again sinking into a listless game the boys were beaten by Michigan State Teachers, 35-20.

Captain Simpson proved to be an able leader and was instrumental in keeping the team in a fighting mood. Simpson's uncanny ability at sinking free throws won him high scoring honors for the year. Rutkowski at back guard was easily the star of the team. He was a mountain on defense and could always be depended upon to play a bang up game. Miran at floor guard played an erratic game. Easily the fastest man on the team, he should have been high point man, but his inability to work under the basket robbed him of many points. Rowley, who warmed the bench early in the season, showed his true ability when Miran was out because of sickness. Robin and Rossing were the two "dead eyes" of the team. Rossing's specialty was follow shots while Robin could sink them from anywhere any time. Ott was a consistent scorer at forward but a bit light in weight for a

ROSSING

SANDSTEDT

ARENDS

college team. His dribbling and ability to sink "longs" could be placed on a par with any one. Tell played at center alternating with Robin and Rossing. He played a defensive game that is hard to match.

Coach Krafft, working under difficulties beyond his control, turned out a team that played good basketball in spite of adverse conditions.

The final tilt of the season, a return game with the Michigan Teachers, was lost, 26-31.

CHARLES W. LEIGH.....Coach
 HENRY CHRISTIANSEN.....Captain

The 1929 golf team going through one of its toughest schedules ended up with a very successful season.

Armour lost its first meet of the season to a more experienced alumni team by the score of $14\frac{1}{2}$ to $9\frac{1}{2}$. The team then walked over Crane, $16\frac{1}{2}$ - $1\frac{1}{2}$. "Tech" dropped the next match to Northwestern University, $17\frac{1}{2}$ - $1\frac{1}{2}$, the worst defeat of the year. Armour then defeated Loyola, 10 and 8. Armour's next victim was St. John's University of Toledo, Ohio, 10 and 8. Loyola then evened up its previous defeat to the tune of $9\frac{1}{2}$ to $8\frac{1}{2}$. In the final match of the season, Armour easily overcame St. John's a second time, 13 and 5.

The success of this year's team is due to Captain Henry Christiansen, Floyd Ong, Frank Pfeifer, Henry Weis, and John Sitzler. Professor Leigh deserves much credit for coaching the men into a very successful team.

TENNIS—1929

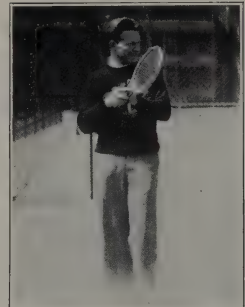

The tennis team of 1929 kept up their championship stride of previous years by winning eight, tying one, and only losing three of their twelve matches.

The team was composed of Stellar, Jennings, Lamb, Eddy, Winkler, Scott and Schirmer.

The first match proved to be quite an upset for Lake Forest tied Armour at three matches all. The team then trounced North Central at Naperville but lost its first match of the season to Notre Dame, at Armour, to the tune of four to three. Here Jennings paired with Eddy to lose his only match of the season in doubles competition. The "gang" then hit their stride and easily vanquished Knox, Wheaton, Michigan State Normal, and Detroit City College by large scores. Michigan State College gave Armour its second defeat of the season, also to the tune of four matches to three. Jennings was the only one to win in singles. Detroit City College dropped a second match on the Armour courts, seven to nothing. All of the men winning their games in two sets.

Grinnell then defeated Armour five to two, but Jennings beat Harris Coggeshall for the second time to the tune of 8-6, 6-0. Coggeshall was the Intercollegiate champion and ranked No. 14 in the national tennis ranking. The season ended when Knox and Lake Forest were easily defeated in rapid succession.

George Jennings, the mainstay of Armour's tennis team for five years, finished his intercollegiate tennis career without a defeat. In outdoor competition last year, he won the Illinois State Championship and also the National Public Parks Championship. He has also been invited to compete for the 1930 Davis Cup team.

SWIMMING—1929-30

The swimming team lead by Captain Fred Strauch and Coach McGillivray, closed a successful season with five victories and three defeats.

The first meet of the season with the South Chicago Y. M. C. A., state champions, ended in defeat for Armour. Although the team was rather loosely organized in this meet, South Chicago won by a score of only 30 to 23.

Following the South Chicago meet the Armour swimmers met and defeated Englewood Y. M. C. A., Hyde Park Y. M. C. A., Chicago Normal twice, and Crane College.

The two meets with Chicago Normal were easy victories. The first meet on February 21st was won 47-13, and the second a week later, was 56-8. In the second meet the Armour boys took first and second place in every event.

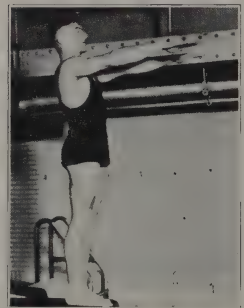

On March 12, "Tech" defeated the highly "touted" Crane College team, 39-36. March 15 saw the Tech swimmers go down to defeat before a powerful team from Culver Military Academy. In this meet Trognitz took the only first place by winning the 100-yard breast stroke.

In the final meet of the season in March, Armour was defeated by Crane College.

Both Captain Strauch and Trognitz are graduating this year. Strauch is a fancy diver of no mean ability, while Trognitz's specialty is the breast stroke event.

The success of the team is remarkable when you consider that they must travel to the U. of C. tank to practice.

Carlstrom, Knox, Wesfon, Cavanagh, Byanskas, La Force, and Davidson will form the nucleus for a strong team next year.

COACH WEISMAN

BOXING

B. WEISMAN Coach
 NORMAN D. BUEHLING.....Captain
 LEON J. STECK.....Manager

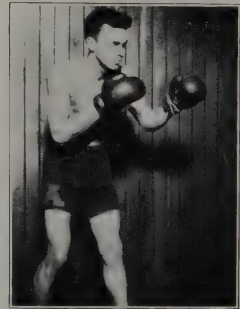

BOXING 1929-30

The 1929-30 season proved to be the most successful in the history of Armour boxing teams. More men reported for practice than ever before, more meets were held, and under the helpful guidance of Coach "Sonny" Weisman and Captain Buehling the team built up their fine record.

Practice started early in the first semester and the team was in good condition for their first meet of the season with the Lincoln-Belmont Y. M. C. A. on January 25th. The meet ended a tie, three bouts to three, Ustryski, Donnelly, and Captain Buehling winning their bouts and Taylor, Montesano, and Sommers losing to the "Y" men.

South Chicago Y. M. C. A. leather pushers met the Armour boys on February 15th. The state "Y" champions were too good for our boys, however, and all of the matches were lost. The match was much closer than the score indicates. All of the bouts were close, two of them being extended an extra round before the judges could make their decision. The men who fought were Captain Buehling, Schlossberg, Whitfield, Montesano, Ustryski, and Morowitz.

The feature event of the season was a home match with the South Chicago Y. M. C. A. This was the first match ever held at the school and over two hundred students attended. A much improved team met and trimmed the South Chicago "Y" three bouts to two. Whitfield, Schwartz, and Ustryski won and Montesano and Morowitz lost.

CAPT. BUEHLING

NELSON, MITCHELL, WHITFIELD, MAJTASIK, MOROWITZ, SCHWARTZ, SANDSTROM,
USTRYSKI, LARKIN, WEISMAN (Coach), BUEHLING (Capt.), STECK (Mgr.),
MONTESANO, DONNELLY.

The next team to fall before the Armour "pugs" was the West Side Professional Y. M. C. A. This match was held at the "Y." The score being 3-2. Captain Buehling, Larkin, Schwartz, Montesano, and Donnelly again upheld the Armour reputation.

The final match of the season was lost to Culver Military Academy, 8-2. Ustryski and Larkin were the only victors on the boxing staff.

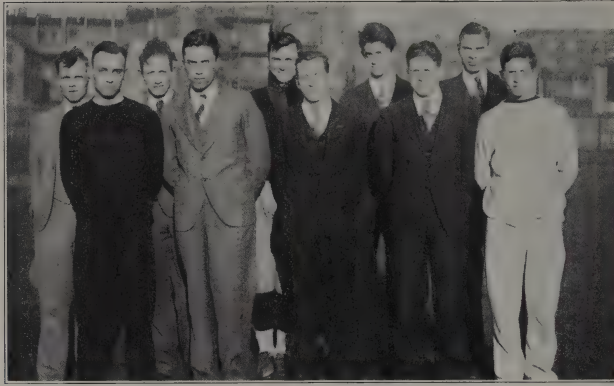

With the graduation of Captain Buehling and Whitfield, in June, Armour will lose two of its cleverest men. Buehling is a clever boxer and aggressive fighter, while Whitfield is of the type known as "counter-punchers."

SCHEDULE

Lincoln-Belmont "Y".....	3	Armour.....	3

MGR. STECK

ERLAND, JAMES, OTT, MIRAN, STEHNO, AUSTIN, KUTTERUF, HOLT, LENKE, JENS

INTER-CLASS ATHLETICS

The class of '31 dominated inter-class athletics during the past year, winning everything but basketball. While sophomores, they started the string of victories by winning the annual Circus Day Inter-class Relay. Henry Fox, Jens, Miran and Kutteruf formed the winning team.

In order to make the baseball play-offs more interesting, Simpson and Stehno decided not to pitch in any of the games. In the first bracket the Sophomores defeated the Freshmen 7-0, while the Seniors lost to the Juniors three to nothing. It took two games to decide the class championships. The Juniors defeated the Sophomores in both games, 4-3 and 4-0.

The Freshmen proved to be the dark horse in the basketball play-offs when they crashed through to win from the Juniors in the finals, 26-15. The Freshmen defeated the Sophomores 8-6 in their first game and the Juniors defeated the Seniors by one point in an overtime thriller. The outstanding star of the basketball tournament was Gustafson, freshman center.

The Juniors polished off the season by winning the annual inter-class track meet at Bartlett Gym. The final results were not determined until the last event was run off. Don Paul won the shot put, as usual, but was beat out in the high jump by Corpstein, a freshman. The Juniors took four third-places, two seconds and two firsts for a total of 20 points. The Seniors were second with 18 points, and the Freshmen third with 16. The Sophomores failed to score a point.

FISCHMAN, BARNETT, CHAMISON, STAHM, KREISHMAN, SIMON,
EDELMAN, WINOGRAND, HOFFBERG

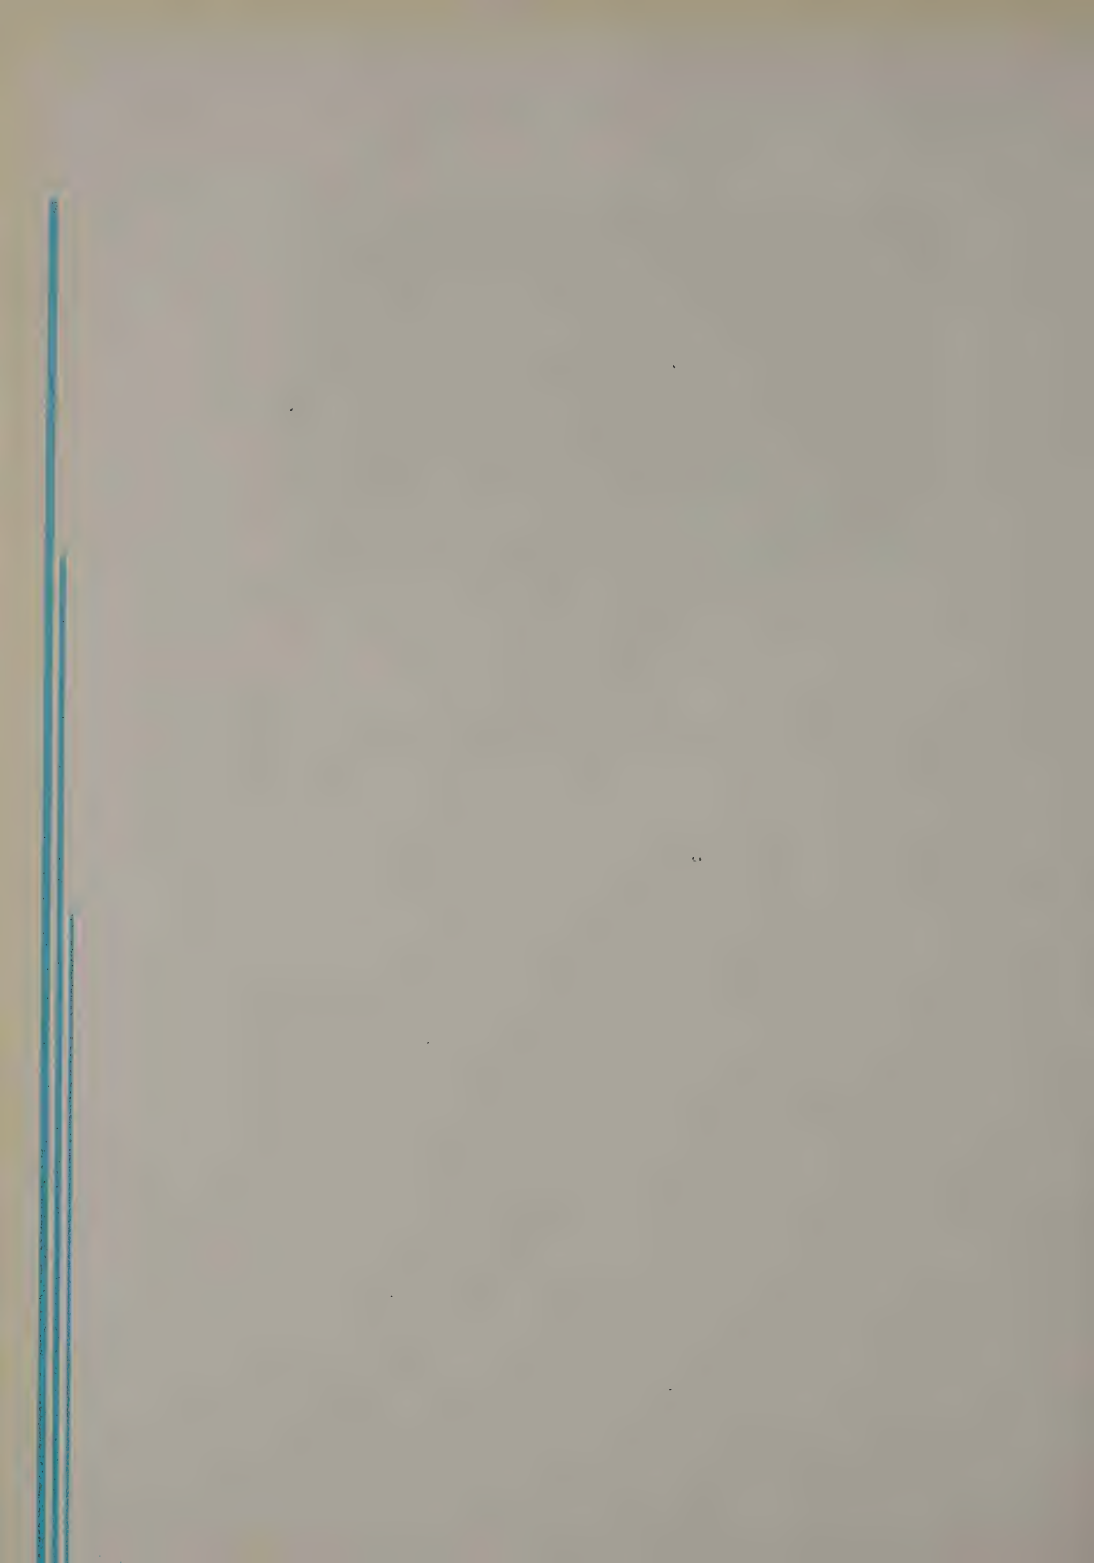

INTER-FRATERNITY ATHLETICS

Inter-Fraternity basketball, as usual, was the most exciting sport of the year. After much struggling between the various teams, Phi Pi Phi emerged victorious for the twelfth time in as many years. The final game of the season put a scare into them, but they finally defeated Delta Tau Delta after an overtime thriller, by the close score of 19 to 18. The winning team was composed of the following men: Leichtenberg, Carlson, Stabovitz, Cassidy, Mead and Erland.

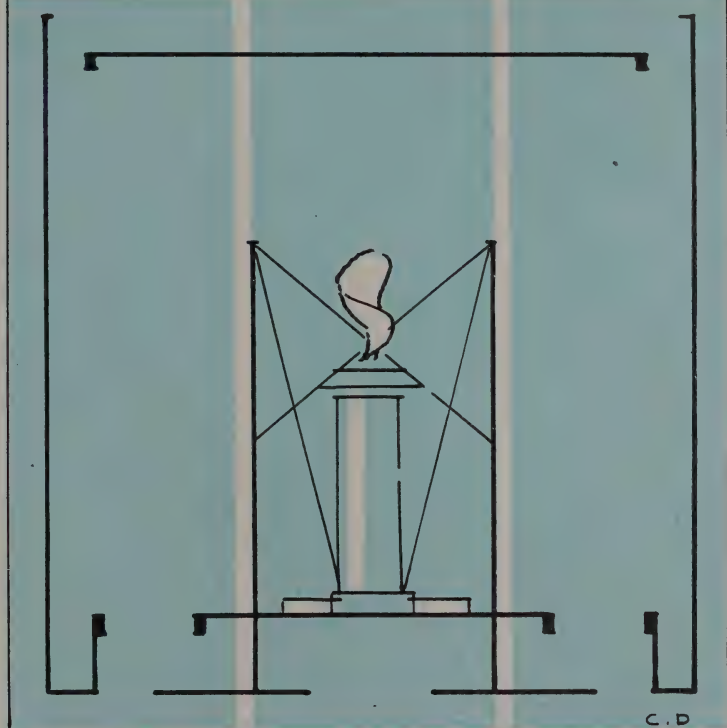

This year's Inter-Fraternity tennis championship schedule was not finished because of inclement weather.

The annual Inter-Fraternity track championships were decided on Friday and Saturday of Junior Week. Phi Pi Phi was declared the champion by winning $38 \frac{2}{3}$ points, and by placing in every event except the 220-yard low hurdles. Beta Psi was second with $31 \frac{1}{2}$ points and Sigma Kappa Delta took third with $24 \frac{1}{4}$ points. The Phi Pi Phi fraternity also copped the Inter-Fraternity relay with W. Buck, E. Gross, J. Finnegan, and H. Leichtenberg composing the team.

Sigma Alpha Mu proved to be the upset of the indoor baseball tournament by defeating the Phi Pi Phi fraternity for the Inter-Fraternity Indoor Championship.

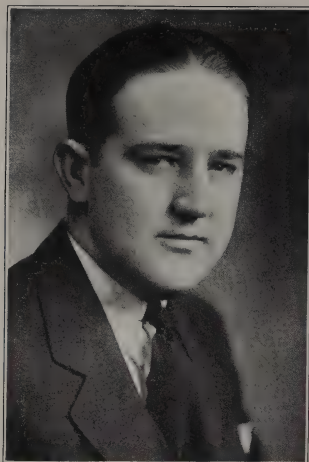

REALIZATION

P. E. HEATH

THE CYCLE

The Cycle. A most unusual title, and yet what term could we have chosen to serve our purpose better?

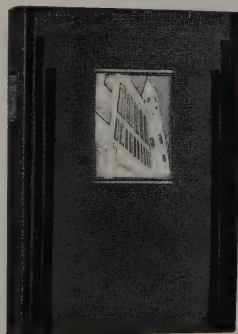

To we who are engineers, it has a significance which may be either captivating and intensely interesting or yet again may be repulsive as it reminds one of the many unsuccessful hours spent in solving its mysteries.

To one who has been a part of the surging school activities it portrays a different picture. Let us say, a picture representing a past period of time in which many events took place, which in the future, will never repeat. A picture in which there have been many subjects.

In offering you this volume it has been our purpose to perpetuate this picture, of past events, with concrete evidence of their happening.

To the engineers it may be pleasing and successful in capturing their approval, or it may be irritating as it reminds them of the unsolved mysteries of the past period from which they have just emerged. In each case the reaction is different and neither the editor nor the staff may say which it will be. The individual's past alone will tell. However, we have endeavored to make the picture pleasing to those who were the subjects, and to make possible a perpetual memento of their college days.

We, who were The Cycle staff, are no more. In our efforts to record events correctly and to pay tribute to those most deserving, we have completed a most enjoyable task. It is with pleasure that we present to you, this volume of happy memories. As you turn through its pages, in the years to come, may you live again those college days—the days of wondrous vigor and untold opportunity.

THE 1930 CYCLE STAFF

AN APPRECIATION

Finally our task is completed and before you is our contribution, the Cycle for 1930. In assembling the material for such a volume it was necessary that we seek assistance from those who were qualified to give advice on matters which to us seemed insurmountable. However, after much thought, argument and hard labor we are finished. In the hearts of the staff there lingers a feeling of joy and sorrow. Joy because the work is done; sorrow because we shall be unable to continue the friendships formed in the work. To those men not directly connected with the Institute and to those who so generously gave of their time that the publication of the 1930 Cycle might be realized, we extend our sincere appreciation.

To President Raymond, Dean Palmer, Dean Penn and Mr. Allison for their interest and unfailing support given to the publication of the Cycle.

To the Faculty Board: Professor Paul, Professor Finnegan and Professor Peebles who gave so generously of their time in supervision of the Cycle.

To Mr. Mathisson of the Standard Photo Engraving Company, who was our friend and adviser, who gave his time that this publication might materialize into its final form.

To Mr. Keller and Mr. Gooder of the D. F. Keller Printing Company for the beauty, the style and the finish that this book possesses.

To the Mabel Sykes Studio, and especially to Mr. Miller, whose co-operation in the photography added so greatly to the appearance of the Cycle.

To every person who gave of his time and energy that the Cycle of 1930 might be realized.

the official alumni organ, was incorporated as a distinct unit of the Engineer. Benefits resulting from such a union have been mutual. Every member of the Alumni Association now receives his copy of the Engineer, thus resulting in a closer union between the alumni and the student body. On the other hand we too have been the recipients of benefits. The magazine has been enlarged, the paid circulation has been increased almost one-half, our advertisers have received full value, and our already strong financial position has been strengthened.

H. H. STEBBINS

THE ARMOUR ENGINEER

The establishment of a technical journal, published by the students, for the use of the students was the motive which, twenty-one years ago, was responsible for the Armour Engineer. Since then the publication has evolved from a dry technical journal of little interest to the student, alumnus or faculty member, one of the foremost engineering college publications in the country. It has become a live, attractive magazine, publishing engineering articles which are neither highly technical nor extremely elementary. It has established an enviable reputation and has done more, perhaps, than any other single agency in spreading and upholding the name of Armour.

The past year saw an important step forward taken, when The Armour Alumnus,

the official alumni organ, was incorporated as a distinct unit of the Engineer. Benefits resulting from such a union have been mutual. Every member of the Alumni Association now receives his copy of the Engineer, thus resulting in a closer union between the alumni and the student body. On the other hand we too have been the recipients of benefits. The magazine has been enlarged, the paid circulation has been increased almost one-half, our advertisers have received full value, and our already strong financial position has been strengthened.

The importance of student articles has been emphasized during the past year, for it is in these that we are the most interested. The winning student article submitted in the contest sponsored by the honorary fraternity, Eta Kappa Nu, was published. Co-operation with the English Department of the Institute has also helped to produce student papers of a high quality. Efforts have been made to organize more efficiently, to obtain greater co-operation, to maintain a staff of men, each contributing his share, all working together for the purpose of bettering the Armour Engineer. Staff appointments have been made with the view of training underclassmen so that when the time comes, they can step into their positions, confident of their ability, and with a thorough knowledge of their duties and requirements.

In past years the Armour Engineer has stood out among the engineering college publications, a magazine of real merit—may she continue as a source of pride to her school and to its graduates.

THE ARMOUR TECH NEWS

The Armour Tech News, having completed its second year of service, does so with the words "Official Student Newspaper" proudly displayed upon its mast-head. No longer on a trial basis, the Armour Tech News is recognized by all as an important and integral part of the Armour Institute of Technology. Its record has furnished the evidence.

It has been the aim of the staff to present all the happenings of the school in an unbiased manner, to make this weekly publication one of a quality worthy of presentation to the students and faculty of Armour Tech. The success with which this has been accomplished may be judged by the splendid support received. The number of students subscriptions has grown with each succeeding semester, while the faculty subscriptions have always been practically one hundred per cent.

Many difficulties have been encountered by the staff in the production of this publication; the demands of scholastic work conflicting with the demands of publication work, and lack of experienced reporters forcing the editors to spend valuable time training men to do reportorial work, being the chief troubles. To more than offset these handicaps have been the whole-hearted co-operation of student body and faculty, and the untiring spirit of enthusiasm of the staff members.

While this year marks the passing of the last of the original managing staff which founded the paper, the incoming editors have given promise of their ability to create an even better publication than before.

ENGINEERING SOCIETIES

H. H. STEBBINS

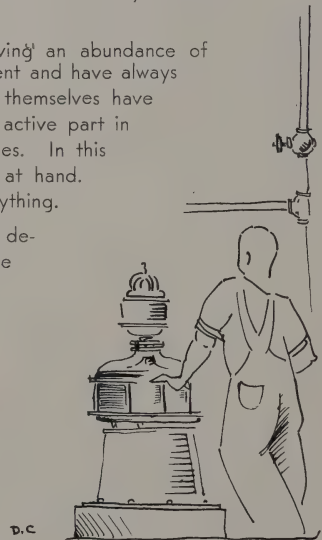

AMERICAN SOCIETY OF MECHANICAL ENGINEERS

PROFESSOR DANIEL ROESCH.....Honorary Chairman
HERBERT STEBBINS.....President
CHARLES VOJTECH.....Vice-President
MARTIN VANDER VELDE.....Secretary
JEROME KOVARIK.....Treasurer

For the first time in the history of the organization, meetings were held at regular bi-monthly periods thus assuring a more continued channel of thought, a greater chance for personal benefit and contact and an even higher degree of intimacy between the members. The success of this new plan has been demonstrated by the whole-hearted co-operation of the faculty and the enthusiasm and spirit shown by the members.

The society has been most fortunate in having an abundance of material on interesting and vital subjects to present and have always been able to get good speakers. The students themselves have created an atmosphere of interest by taking an active part in helping prepare and giving some of the speeches. In this way, the material seems more human and close at hand. For self-participation gives a healthy color to anything.

Knowing that there are advantages gained by developing both the inner as well as outer man the society has held two smokers thus strengthening the bonds of comradeship that exists between fellow students. A new innovation in the way of refreshments has been tried and has proved a great success. The reason being that sandwiches, pretzels and near beer (nearly legal) were served. Going to show that men will be men even at Armour.

TOP ROW—ROMINE, GAREN, ABAZORIS, PILGRIM, RAMBOLT, TOOPECKOFF, FROST, CARLSON, ERLAND, HELLER, SADLAK, MUNCH, STEVENSON, COLLINS, DEERING, LINK, VAN DER VELDE.
 CENTER ROW—KRAUSE, LAMKA, O'CONNOR, WILLARD, MALLEY, SPIEGEL, HESS, NELSON, DAVISSON, SMITH, WINKLER, ZWART, JOHNSON, PORE, LIND, SPENCER.
 BOTTOM ROW—NOVOTNY, WESELIK, SCHOEN, KOVARIK, VOJTECH, LIBBY, NACHMAN, GEBHARDT, STEBBINS, HARTANOV, CZERNECKI, BORROWDALE, SCHIFF, FAULSTICH, ROWLEY, HIGGINS, STRASSENBERG, ANDERSON.

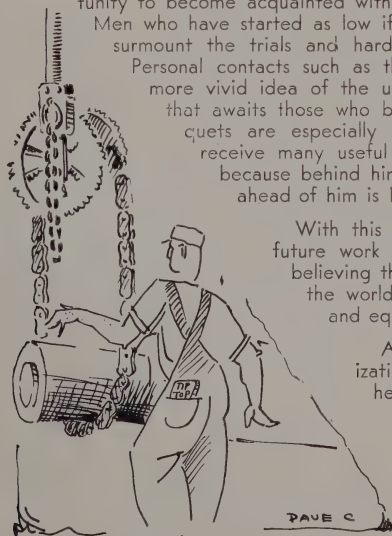

The society is looking forward with keen anticipation to the joint banquet between the Armour branch and the parent society, down town. This event, one of the outstanding of the year, provides for the students an opportunity to become acquainted with young and old men in their profession.

Men who have started as low if not lower than they, and have had to surmount the trials and hardships that face the graduating senior.

Personal contacts such as these give a more lasting impression, a more vivid idea of the usefulness and blessedness of the career that awaits those who but lift their heads to see. These banquets are especially helpful to the senior because he can receive many useful ideas about the world he is to enter because behind him is shelter and ready condolence, while ahead of him is hard practical experience.

With this view in end the society is planning its future work with an idea of the practical in mind, believing that it is better to thrust the student into the world as it is, prepared for any emergency, and equipped to face the facts.

A good share of the success of the organization, the society feels, is due to the ever helpful guidance and assistance of our Honorary Chairman, Professor Roesch, and the students wish to thank him for the time and effort that he has so generously put into the work of the society.

J. DOLLENMAIER

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS

OFFICERS

JACK DOLLENMAIER	Chairman
JOHN PAPANTONY	Vice-Chairman
STEPHEN JANISZEWSKI	Secretary
CARLTON RUDELIUS	Treasurer
PROFESSOR E. H. FREEMAN	Counselor

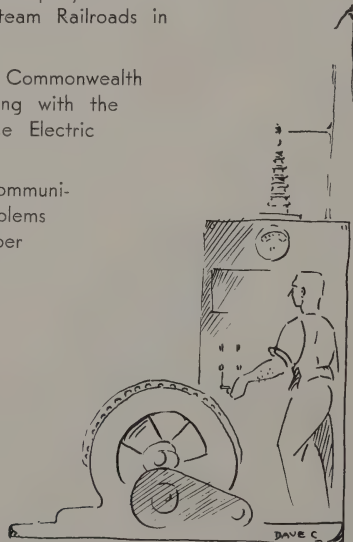

Promoting interest among its members along the electrical lines and giving them an insight into the practical side of the American Institute of Electrical Engineers is the purpose of this group. During the successful season of 1929-30, membership privileges were extended to the Sophomores as well as the Juniors and Seniors.

The policy of the local branch has been to hold its regular meetings twice monthly. With the efforts of the program committee this policy has been strictly adhered to in providing speakers to the well attended lectures.

The first meeting of the year was a joint meeting with the W.S.E. at which H. H. Field, of the Public Service Company of Northern Illinois, spoke on "The Electrification of Steam Railroads in Europe."

On November 15, Alex D. Bailey, of the Commonwealth Edison Company, addressed a joint meeting with the A.S.M.E. on "The Fundamental Unit in the Electric Utility Field."

P. F. Wareing, of the Universal Wireless Communication Company, discussed "Engineering Problems of the Universal Wireless," at the December 6th meeting.

TOP ROW—BUEHLING, FILMER, FETTERMAN, TRZYNA, VAN OSDOL, BREH, WILLIAMSON, STEIN, MECK, JOHNSON, DAVIDSON, HAMLIN, SCHOHL, BONVALLET, WESTON,
FOURTH ROW—OLSON, FOX, HUGHES, MYERS, MURPHY, SCHRADER, KREIBICH, LUKEY, BLAHNA, PASCHKE, STRANBERG, RASMUSSEN, KORRELL,

"Chicago Civic Opera Stage Lighting Control," was the topic of K. R. Ross's lecture on January 10. The speaker from the General Electric Company described the Selsyn-Thyratron lighting control system with illustrations.

The Educational Director of the Central Station Institute of the Commonwealth Edison Company, Mr. Maiers, gave an illustrated lecture on "Know Illinois."

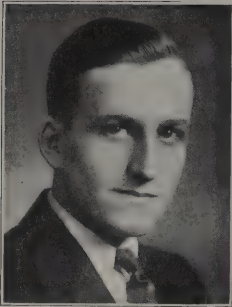

John H. Bell, telegraph engineer of the Bell Telephone Laboratories, spoke on "Modern Telegraphy—A New Art With An Old Name."

In December, the Great Lakes District of the A.I.E.E. held its convention at the Drake Hotel, affording the "electricals" a three day vacation from school. The time was spent in attending technical sessions, inspection trips and a dinner-dance.

The Spring Smoker, which was held in March at the Theta Xi House, climaxed the year's activities of the Branch.

WESTERN SOCIETY OF ENGINEERS

E. BLOMME

OFFICERS

EMIL BLOMME	President
WALTER WILSON	Vice-President
JOHN B. SITZLER.....	Treasurer
EDMUND CHUN.....	Recording Secretary
JOSEPH ELLMAN.....	Corresponding Secretary
ROBERT WILLIAMS.....	Student Representative
PROF. M. B. WELLS.....	Faculty Adviser

This year the Armour Branch of the Western Society of Engineers feel that they have written another full page in their history by bringing out even more clearly than before their purpose of bringing the students of the Civil Engineering Department in closer contact with the men engaged in the engineering profession and in this way stimulating an active and creative feeling of unity between the school and the men in the field.

Owing to the representative speakers and the living and vital topics chosen, the meetings have had an unusually large attendance, not only by the seniors and juniors, but by the sophomores as well. The downtown branch has been especially active and kind in their assurance of help and cooperation in providing speakers and arranging inspection trips. The rooms of the parent society have been donated to the Armour men for their smokers and a special invitation to use the facilities of their large engineering library has been extended to them.

Among some of the outstanding lectures of the year were the following:

- "The Electrification of Railroads in Europe"
by Mr. H. H. Field
- "Chicago Bascule Bridges"
by Major Paul Schioler
- "Chicago's Water Supply"
by H. R. Matthei

TOP ROW—MacLENNAN, RUDOLPH, BILLINGS, JACKSON, MUELLER, NELSON, SKOULARINAS, MOROWITZ, JOHNSON, KARA, ROSSING, HROMADA, HORNBERGER, WESTERBERG, ESKONEN, BROTMAN.
THIRD ROW—DICKE, IVERSON, MORGAN, WEST, HURLEY, ANDERSON, ERICKSON, RICHTER, KOHOUT, ZACHER, OLSON, RASMUSSEN, GIBSON, NELSON, McKANA, WINDBIGLER, HELSEN.
SECOND ROW—McLAUGHLIN, AUERBACH, STATKUS, LOPATOWSKI, WERNICKE, SANTINA, JORDAN, MARKHAM, WEITZUL, ELLMAN, CHUN, MANSKE, HAFNER, WOODS, FENSTERLE, DUSBERGER.
FRONT ROW—BERGER, SACHS, STECK, MILLER, PEARCE, GRAFTON, ENSZ, PHILLIPS, WELLS, STEVENS, PHILLIPS, WILLIAMS, WILSON, SITZLER, CHAMISON, FISCHMAN, COURTNEY.

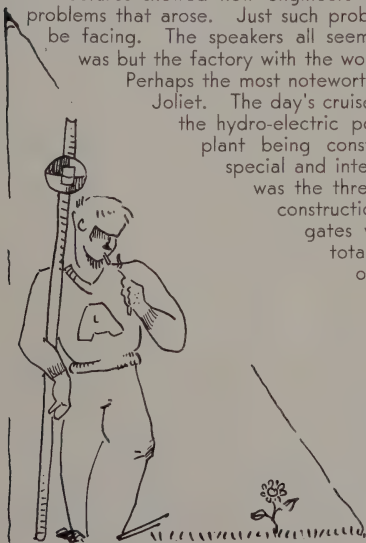

These lectures showed how engineers the world over were solving, day by day, problems that arose. Just such problems as the men in school would some day be facing. The speakers all seemed to create the thought that the school was but the factory with the world as the proving grounds.

Perhaps the most noteworthy of all the inspection trips was the one to Joliet. The day's cruise included the magnificent dam at Lockport, the hydro-electric power plant, and the new dam and power plant being constructed a little distance downstream. A special and interesting feature of the new dam being built was the three sets of locks that were in the process of construction. These locks each consisted of two steel gates weighing 200 tons apiece, making in all a total of 1200 tons. The gates themselves were of a cantilever construction.

It is such first hand information as this on these huge engineering feats that make the study of engineering so fascinating.

The society is planning to attend some of the meetings of the parent body en-masse at which some of the most famous engineers of the country give talks.

A few of the contemplated trips yet to be taken are visits to the Buffington Cement works, the cribs, and the tunnel.

AMERICAN INSTITUTE OF CHEMICAL ENGINEERS

J. TARMAN

OFFICERS

JOHN TARMAN	President
FRED ATTWOOD	Vice-President
OLIVER FIALA	Secretary
ISADORE KATZ	Treasurer

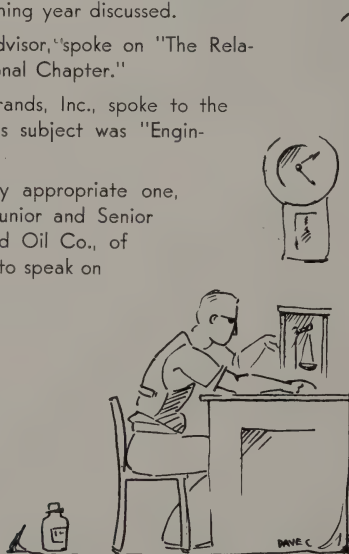

The Beta Chapter of the American Institute of Chemical Engineers enjoyed a very successful year. The attendance at every meeting was large, and the chapter's relation to the professional chapter were emphasized more than ever before.

The first meeting of the year was held on October the fifteenth, when officers were elected and plans for the oncoming year discussed.

On November 13, Dr. Tolman, chapter advisor, "spoke on "The Relationship of Student Chapters to the Professional Chapter."

Professor J. Summers, of the Standard Brands, Inc., spoke to the chapter on the sixteenth of December. His subject was "Engineering Problems in the Baking Industry."

The subject of Heat Transfer was a very appropriate one, fitting in with the laboratory work of the Junior and Senior students. Mr. E. W. Thiele of the Standard Oil Co., of Indiana, came to the Institute on January 14 to speak on this subject.

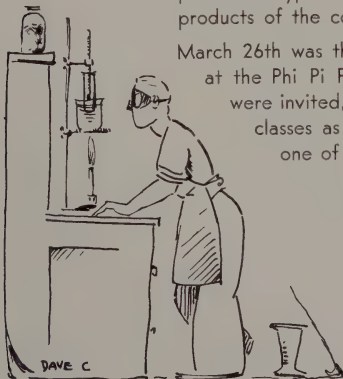

TOP ROW—FLEISHMAN, CRANE, BIGELOW, VENEMA, LIND, HODGSON, FIELD, BLOM, VIEL, HOLLAND, RATNER, BERGER, LINNELL, WESTENBERG, WLEKLINSKI, LOMASNEY, STEMP-KOWSKI, STOCKMANN.

CENTER ROW—KUBICKA, SKRAKOWSKI, GOLDMAN, MARTIN, TROGNITZ, BAILEY, STAM-
BERG, PODLIEC, AUKSTAITIS, MONTESANO, MELCAREK, RIMMKE, MORRIS, RUZEVICH,
CAVANAGH, MUELLER, LEHMAN.

BOTTOM ROW—MARKER, FOIN, TREVOR, ZOLAD, YOUNG, GARFINKLE, LICHTENSTEIN, ATT-
WOOD, TARMAN, FIALA, KATZ, LATHAM, STEINERT, SIMPSON, WHITFIELD, SCHWARTZ,
GUYOT.

Mr. Cooley of the Whiting Co., of Harvey, continued along the line of heat transfer with a talk presented to the society on the 21st of March. His subject was "Evaporators," dealing with the methods of design and the uses of the specialized types. He explained in detail several of the latest products of the company.

March 26th was the date of the annual smoker which was held at the Phi Pi Phi House. Members of the Freshman Class were invited, and a large turnout of the members of all the classes as well as many of the faculty made this affair one of the most successful ever given by the society.

FIRE PROTECTION ENGINEERING SOCIETY

J. E. RANSEL

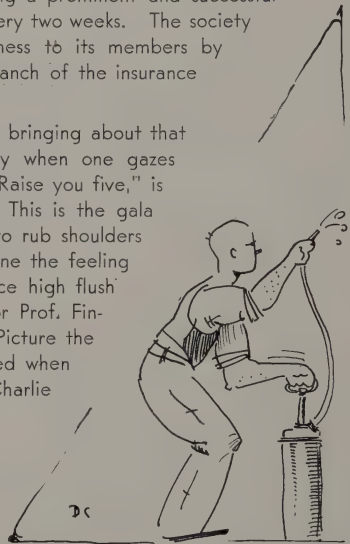

OFFICERS

J. E. RANSEL.....	President
P. E. HEATH.....	Vice-President
W. SCOTT, JR.....	Treasurer
A. C. GUNTHER.....	Secretary
PROF. J. B. FINNEGAN.....	Faculty Advisor

The Fire Protection Society was formed primarily to perform two duties. The first, to give the members of the society a definite contact with men in the field, the second to promote a spirit of good fellowship among its members and provide a personal contact with the faculty of the department.

This first function is carried out by securing a prominent and successful insurance man to speak before the society every two weeks. The society attempts to show every aspect of the business to its members by choosing speakers from every conceivable branch of the insurance business.

The second function of the society, that of bringing about that feeling of good fellowship which is felt only when one gazes through a cloud of cigar smoke and grunts, "Raise you five," is realized in the annual Fire Protect Smoker. This is the gala occasion when the Freshmen are privileged to rub shoulders with the knowing Seniors and faculty. Imagine the feeling a Sophomore must have when he slaps an ace high flush on the table and relieves Mr. J. V. Parker or Prof. Finnegan of the bulkiest part of his bank roll. Picture the malicious delight with which a Senior is stirred when he throws four or five straight passes with Charlie Holmes begging for crap.

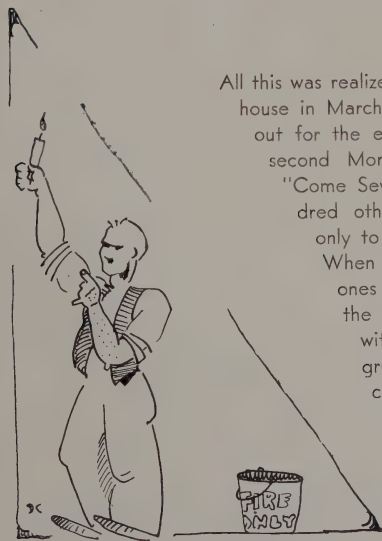

TOP ROW—BERG, PEARSON, BELFORD, CARLSTROM, SCHIRMER, SORESENSEN, BODINSON, KAJKOWSKI, WHEELAND, NARTEN, LOSSMAN, STEINHAUS, MONTGOMERY, W. SCOTT, B. SCOTT, SCHRAGE, HEATH.

THIRD ROW—GURA, PECHMAN, KUTTERUF, BEATTY, HAEGELE, HOTCHKIN, SWANSON, MULLINS, MIRAN, LANGHAMMER, REGLEIN, GUNTHER, SPALDING, WILSON, ERLAND, MUELLER, TILT, BROWN, LARKIN.

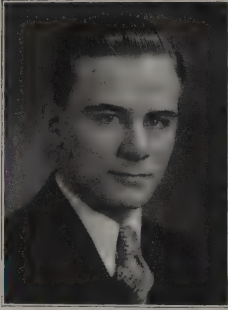

SECOND ROW—CURRAN, OTT, GRIESMAN, ELLIS, DAVISON, CLANTON, MEYER, KESSELRING, SEIDELMANN, WILDE, AUSTIN, HOLT, KNOX, SCANLAN, JACKSON, MAGNUSON, MOORE, KRAMER, ROSS, JENS.

BOTTOM ROW—WINKLER, NORDELL, JENS, WELDON, RANSEL, PAUL, ARENDS, FREER, STALZER, YOUNG, SCHULTZ, JOHNSON, SCHODDE, ARENDS, JAMES, SHORT, KILBOURNE.

All this was realized at the smoker held at the Delta Tau Delta house in March. All state and national laws were declared out for the evening and the house was converted into a second Monte Carlo. The walls rocked with cries of "Come Seven," "Little Joe," "Bet the Ace" and a hundred other expressions which are ordinarily familiar only to such men as Baldwin, Gunther and Reglein. When the smoke had all cleared away the worthy ones who had managed to beg, borrow or bury the largest stack of greenbacks were presented with a handsome prize. This may seem incongruous, but 'tis well known that "nothing succeeds like success." The "chow" which Ted Schueler found time to prepare will long remain as a "horrible example" to the future "can opener ball and chain" of the Fire Protect.

ARMOUR ARCHITECTURAL SOCIETY

E. MINX

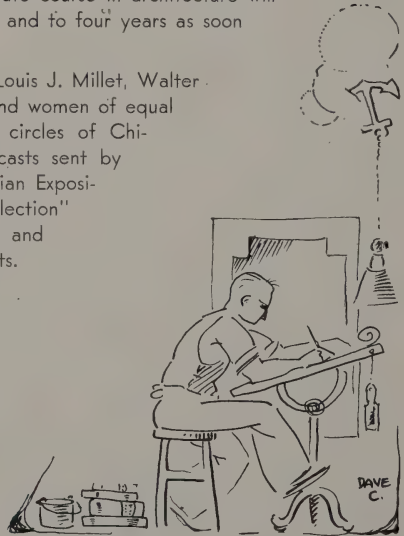

OFFICERS

EMIL MINX Massier
 MARTIN BRAUN.....Sou Massier

The school of architecture of the Art Institute of Chicago was founded in 1889. It was one of the branches of the Institute in their courses of instruction in art. The students in architecture were to have surroundings of artistic culture.

By 1893 a two year course was offered and as stated in the school catalogue of the season, "The Art Institute course in architecture will be extended to three years immediately and to four years as soon as possible."

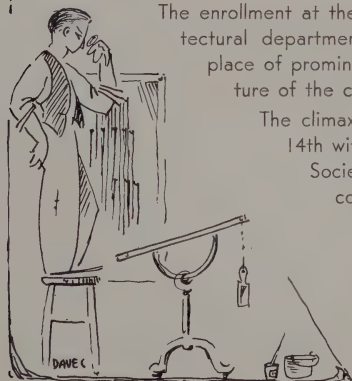

At this time the instructors included Louis J. Millet, Walter Shartuck, William Otis and other men and women of equal prominence in the art of architectural circles of Chicago. The collection of architectural casts sent by the French Government to the Columbian Exposition in Chicago, "The Tracadero Collection" were turned over to the Art Institute and were used by the architectural students. The library of the Art Institute included about 200 books on architecture.

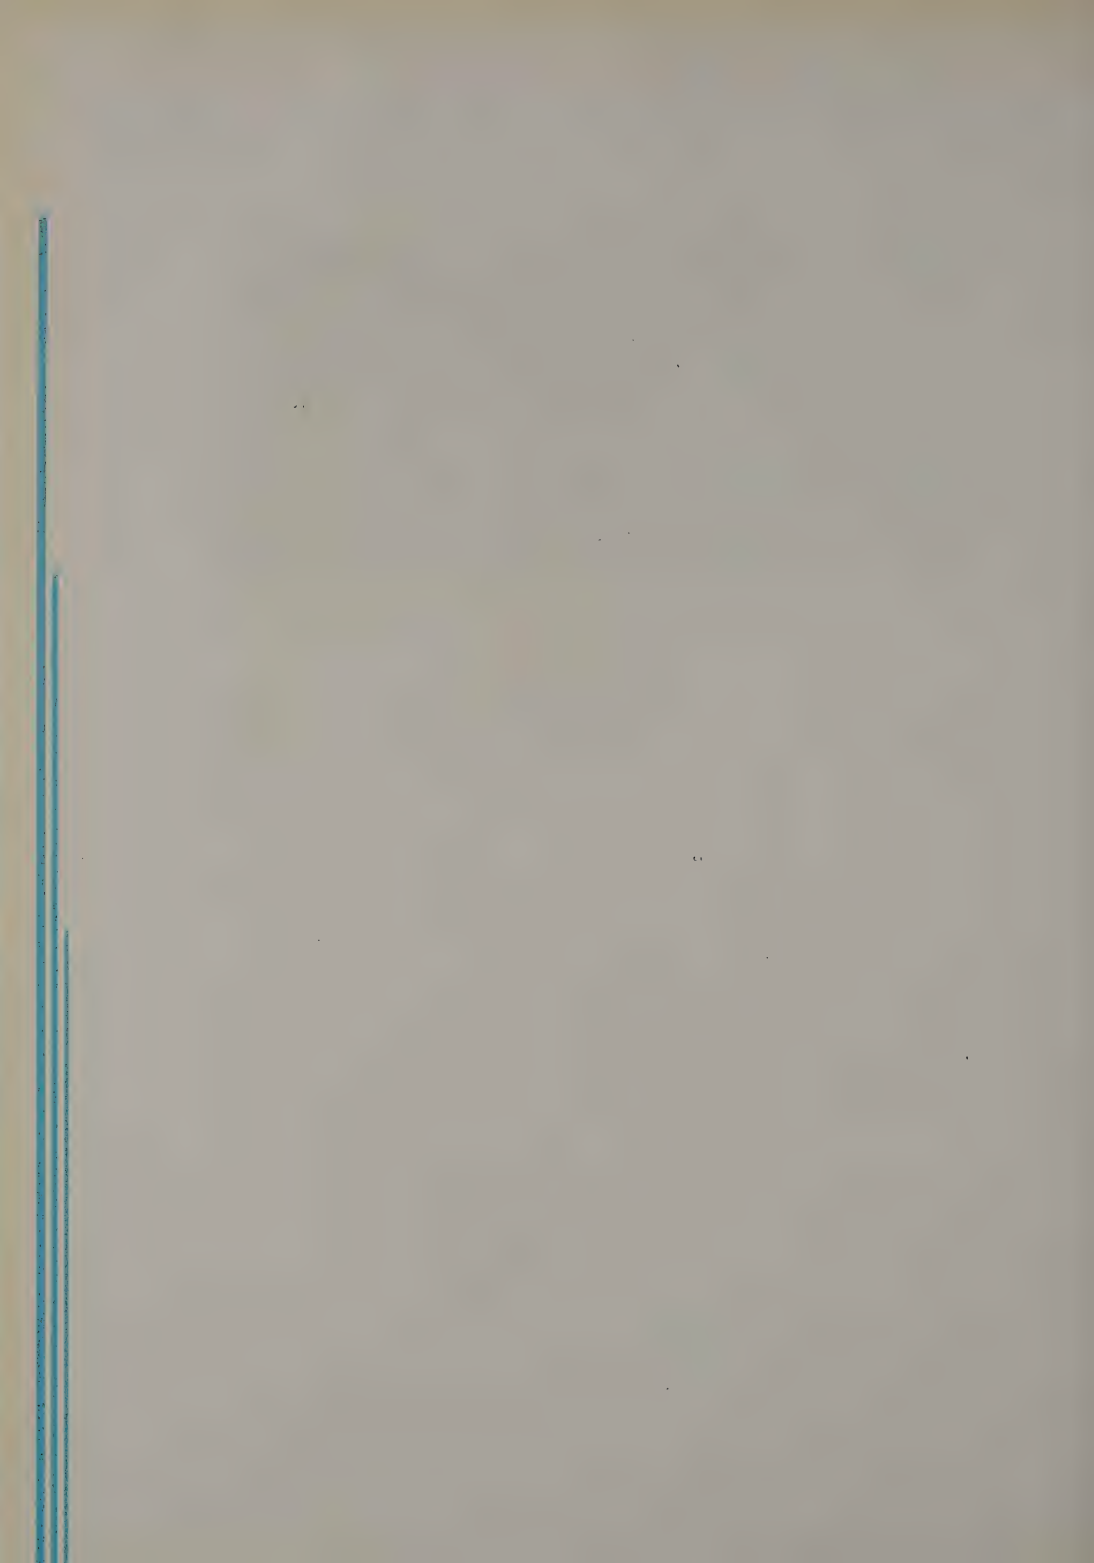

TOP ROW—SOMMER, DONNELLY, EMLING, SCHULTZ, HOFFMANN, DUBSKY, TERK.
 THIRD ROW—REISNER, SHOAN, BARNETT, KUBICEK, PALMA, PETERSON, SCHOCK, COSTANZO, BRAUN, SCHWARTZ, WEISBERG, SANDSTEDT, NELSON, SEVENHOUSE, MINX, DOANE, BOWLER.
 SECOND ROW—CHIN, BAUR, GUTHMAN, RUNGE, CHAPMAN, ROSEN, SPIERER, DeLONG, VALLETTE, ANDERSON, PAPPAGEORGE, NOVAK, JANSSEN, WALLGREN, SCHAGEL, MILES, LaFORCE.
 BOTTOM ROW—REICHLER, ROSENQUIST, BUECHELE, HOLIN, DODSON, BANTA, SIMONS, NAVRATIL, NELSON, SLAVITT, MEYER, DUTT, JOHANSEN, MARAS, HENSON, STUERMER.

In 1893 the Art Institute architectural department formed an alliance with Armour Institute. The class enrollment at this time was 41. The engineering studies were taken up at Armour and the art studies were at the Art Institute.

The enrollment at the present time has grown to 147. The architectural department's high achievements have placed it in a place of prominence with the other great schools of architecture of the country.

The climax of a highly successful year came on March 14th with the initiation of the Freshman Architectural Society at the Architects Club of Chicago. The complete program including the initiation, banquet, talks and entertainment was pronounced one of the most successful in the history of the society.

ARTHUR E. NELSON.....	Treasurer

THE ARMOUR TECH. MUSICAL CLUBS

At the first assembly of the year a surprise greeted the students of Armour Tech as they listened to the newly formed Symphony Orchestra. The organization was so enthusiastically received at that time, and ever since, that it has been obliged to repeat numbers several times, for on numerous occasions it has been required to exhaust its repertoire completely.

Such acclaim is always merited and in no way is this instance an exception. The brilliant achievements of this, our major musical club for the past year is one which should stand out as an ideal to be strived for during the years to come.

The annual Christmas Concert was postponed this year on account of forbidding weather. Instead of this function a Mid-Winter Concert was held soon after the opening of the second semester. Both the Orchestra and the Glee Club gave very good accounts of themselves. Besides these organizations several novelty features were tried and found to be a welcome addition to the program.

PROF. LEIGH

« CYCLE « 1930

VOJTECH

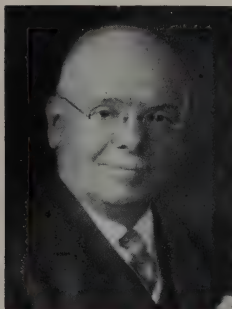

KOVARIK

HURLEY

NELSON

During the second semester in addition to several assemblies, a new program was added to the list. This latest experiment was an All-Glee Club Concert. The offerings of this body under the able leadership of Dr. Daniel Protheroe were very well received by the audience.

To close the official season, the Armour Tech Musical Clubs united once again to produce a wonderful evening of entertainment for faculty, students and guests at the annual Home Concert. The Annual Home Concert of the Musical Clubs was held Thursday evening, May 15, at 8:00 p. m. in the Assembly Hall of the Mission building. The Glee Club, Orchestra and Stresses and Strains were featured on the program. The annual interfraternity sing was also staged at this time. The Orchestra was first on the program with a group of theme numbers, which included the "Gypsy Love Song," by Victor Herbert; "Elorado," which was written by Dr. D. E. Protheroe and dedicated to the Armour Glee Club, was the selection of the Choral group. A number of snappy tunes were listed on the program for the Stresses and Strains. As was expected this last appearance of the year was the crowning achievement. And as we look back over the record left by the 1929-30 clubs we feel that we have more than upheld the high standards set by those who have gone before.

DR. PROTHEROE

ORCHESTRA

FRANK J. ASTE—Director

This year saw the birth of a new organization—a little symphony orchestra. The absence of sufficient material to complete a well rounded band prompted the action of combining the band and the orchestra. This consolidation augmented the orchestra, and formed an efficient combination.

With the advantage of the added instrumentation the Little Symphony had a double mission to fulfill—they had to replace the two former musical organizations which they supplanted, the orchestra and the band. The Little Symphony nobly replaced the band at the assemblies, and the music produced did not lack the fiery emotion of the former strains of the band.

The organization of this body was decidedly advantageous. It was successful in accomplishing more as a combined unit than the separate organizations could have hoped for. This was its first year and the path that has been blazed is a bright and hopeful one.

With Frank Aste as director, this organization was able to prove its worth with the whole-hearted support of the entire body.

F. J. ASTE

FRONT ROW—SCHRAMM, KRUCHTEN, STEINHAUS, MILLER, KOVARIK, CARLSON, TERP, HOFFMAN, OTTO, BELFORD, JANSSEN, WELDY, ESCOTT.
REAR ROW—FREER, WAHLSTRAND, MANSKE, GOLDSTEIN, McCALL, CHELLBERG, WEGNER, NEBEL, KELLNER, DUBSKY, YOUNG, CHANDLER, WILKE, TATOMER, RUPPRECHT, GURA, CURRAN, SCHULTZ.

THE GLEE CLUB

DR. DANIEL PROTHEROE.....	Director
MRS. ALBERT BURHOP.....	Pianist
WILLIAM MANSKE	President
MARK HOTCHKIN	Manager

This year the Glee Club has completed another year of its brilliant work. Many voices from the previous years have returned and the new members had exceptionally good voices, the different parts were also evenly balanced, which altogether made the Glee Club what it is today.

Dr. Daniel Protheroe, the director, deserves unlimited credit for the work he has done with the club. This is his fourth year directing the chorus. Dr. Protheroe is nationally famous in this country as a voice culturist and as a chorus director—he directs ten choruses in Chicago, Milwaukee, and Gary, Indiana, and is as well known in Canada and in the British Isles. The Institute and the club are fortunate in having so great a conductor.

Dr. Protheroe has set Edgar Allen Poe's poem "Eldorado," to music and has dedicated it to the Armour Glee Club. It had its premiere at the Home Concert a year ago.

DR. PROTHEROE

ARMOUR TECH CAMPUS CLUB

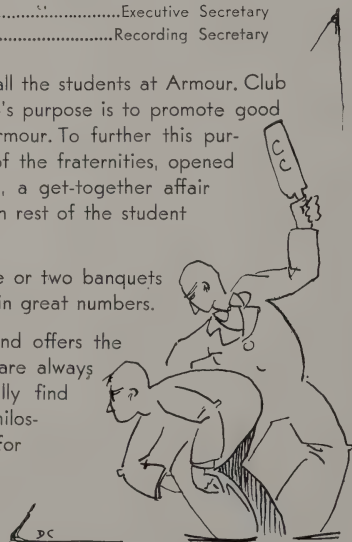

OFFICERS

JOHN STRANBERG	President
JOHN CAVANAGH	Vice-President
JAMES FILMER	Executive Secretary
WILLIAM GUYOT	Recording Secretary

The Campus Club is an organization open to all the students at Armour. Club rooms are maintained in Chapin Hall. The club's purpose is to promote good fellowship and friendship among the men at Armour. To further this purpose, The Campus Club, with the cooperation of the fraternities, opened the social season with the Freshman Handshake, a get-together affair for the purpose of acquainting the freshmen with rest of the student body.

During the past year several smokers and one or two banquets were held with members and guests turning out in great numbers.

The club is primarily a social organization and offers the use of its facilities to the student body. You are always welcome at the Campus Club and can usually find someone willing to discuss politics, religion, or philosophy or play bridge, chess, checkers, or—well, for information see Herb Stebbins.

FILMER, BIGELOW, SQUIRES, REBER
FAGEN, VAN OSDOL, GOLDEN

ARMOUR RADIO ASSOCIATION

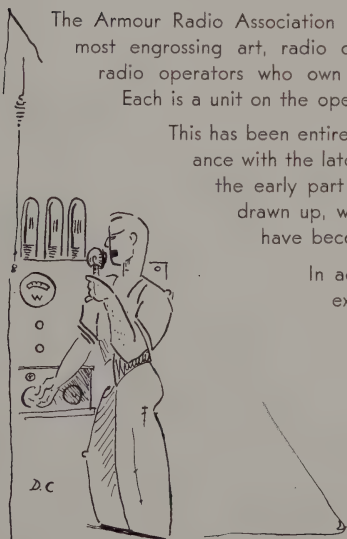

OFFICERS

ROBERT VAN OSDOL President
FOLGER BIGELOW Vice-President
MORTON FAGEN Secretary-Treasurer

The Armour Radio Association is an organization of students interested in the most engrossing art, radio communication. All the members are amateur radio operators who own private stations licensed by the Government. Each is a unit on the operating staff of the Institute station.

This has been entirely rebuilt, the new arrangement being in accordance with the latest practices in high frequency communication. In the early part of the year, a definite operating schedule was drawn up, with the result that Armour's call letters, W9NV, have become well known throughout the country.

In addition to the actual operating, a number of experiments have been conducted in the interest of more efficient telegraphic radio. In these ways the Association performs a recognized function of the school activities.

DRAUS, JORDAN, TRZYNA, KARA, PHILLIPS
DUSBERGER, SANTINA, NOVOTNY, JOST
WEITZUL, MARKHAM, WILLIAMS

THE TRUSS CLUB

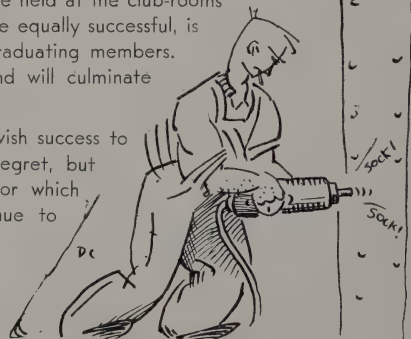

OFFICERS

I. J. NOVOTNY	President
R. MARKHAM	Vice-President
C. A. LARSEN	Secretary
W. J. SANTINA	Treasurer

With the close of the college year the Truss Club ends its sixth successful year as an institution of the campus.

The social activities were initiated with a smoker held early in October when the members, meeting across the bridge table, surpassed each other with tales of a vacation spent in rendering inestimable aid to the engineering profession. This was followed by several banquets and dinners held at the Hotel Sherman. Two more smokers were held at the club-rooms during the Spring semester. Promising to be equally successful, is the banquet to be given in honor of the graduating members. This event will come late in the Spring and will culminate the social activities for the year.

The Truss Club takes this opportunity to wish success to the graduating members, who leave with regret, but with the assurance that the organization for which they labored so conscientiously will continue to fulfil their fond hopes of achievement.

TOP ROW—IVERSON, WINEGAR, DOUGLAS, FEINBERG, YOUNG, BENGSTON, LINNELL, JENSON, HESS, HELMICK, POOLER, CORNWELL, RICHTER, FIALA, ATTWOOD, COLLINS, BOTTOM ROW—JANISZEWSKI, MATHESON, IOVINO, WILSON, EBERTH, FILMER, PATLA, STIER, HELLER, KOHOUT, NEBEL, McINERNEY, BOGOWICZ, ZIMMERMAN, WINOGROND, HACKLEY.

RIFLE CLUB

OFFICERS

HERBERT STIER.....	President
LOUIS STATKUS	Vice-President
STEPHEN JANISZEWSKI	Secretary
GEORGE KOHOUT	Treasurer
HIRAM MONTGOMERY	Sergeant-at-Arms
ADAIR HESS	Range Officer
GEORGE HELLER	Manager
PROFESSOR J. F. MANGOLD.....	Faculty Advisor

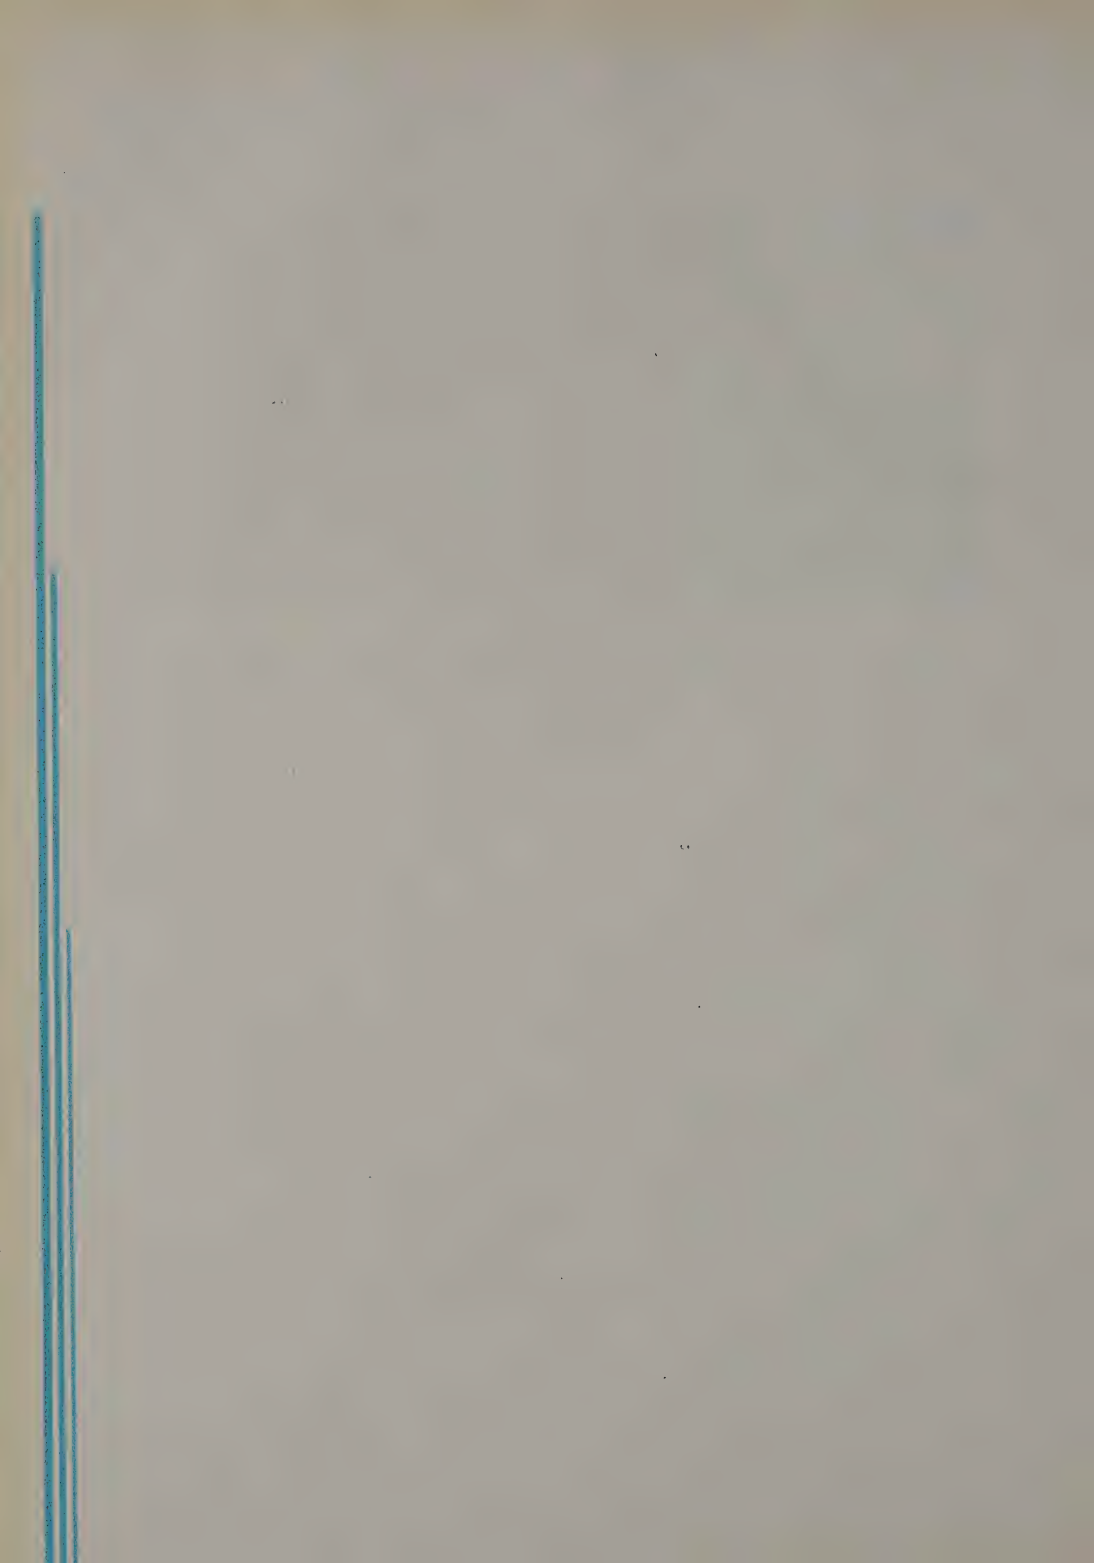

The Armour Tech Rifle Club had a most successful year. The membership was the largest during the club's existence and the activities carried out by the club were in accordance with the number of members. Many matches, both postal as well as shoulder-to-shoulder, were fired. The most notable of the matches being: Crane College, St. John's Military Academy, and the Humboldt Park Rifle Club.

Although many good men were lost by graduation, wonderful material for the team was found in the Freshman class and we all hope that they will continue the good work.

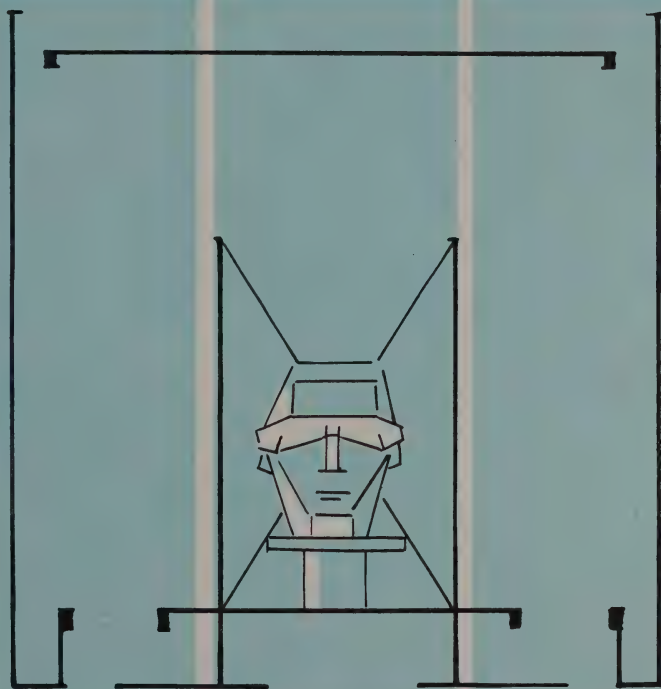

The most notable and grateful achievement of the club was the acquiring of a home range in the basement of Chapin Hall.

The growth of the club, it being only three years old, shows the interest in shooting at Armour.

FATERNITY.

OUR general construction activities include institutional work of almost every character—hospitals, clinic buildings, nurses' homes, dormitories, recitation halls, penitentiaries, power plants—all built in close co-operation with the architect.

Under our form of contract the work is done quickly and at low cost, workmanship of high quality is assured and the interests of trustees and officials are safeguarded.

CHICAGO, ILL., U. S. A.

Remember 'way back when—

THEY RODE ON BICYCLES BUILT FOR TWO?

IN THOSE DAYS they did their butchering in cold weather because artificial refrigeration had not been developed.

In the early days of Armour and Company one of the important decisions that had to be made each evening was whether the hog carcasses, prepared that day, should be kept out in the open air hanging space or moved into ice-cooled rooms. If the weather was reasonably cold, and likely to remain so, the carcasses stayed out. When there was sudden change of temperature after working hours, the night watchmen had to hurriedly collect a gang and move the carcasses into the chill rooms. Off-condition products were accepted as a matter of course and 10% to 20% loss was regarded as inevitable.

Today the loss of a single piece of meat

is a tragedy. Pork products are kept under mechanical refrigeration at all times. The temperature is maintained within a degree of ideal and the humidity is accurately controlled.

Meat leaves the packing plant in pre-cooled refrigerator cars which are iced in transit; and at destination the meat is again placed in mechanically refrigerated rooms, thermostatically controlled.

In the old days the public could never be certain of its fresh meat supply. Salted or pickled meat was the rule throughout most of the year.

Today it is possible for the consuming public to have fresh, wholesome meat at all times and places, and the quality is far beyond that which obtained in the days when people rode on tandem bicycles.
